Gastric Substitutes Jürg Metzger, Felix Harder, Markus von Flüe, 2012-12-06 TONY AMERY In 1897 the Swiss surgeon Carl Schlatter carried out the first successful total gastrectomy for gastric cancer. Three years earlier, Haberkant reported on a patient with the fewest postoperative problems. Danzig reported a mortality rate of 54.4% in a series of 257 resections for gastric cancer. Currently, the Roux-Y reconstruction is the most favoured procedure. Over the last 100 years, there have been radical changes in surgical care which have produced massive reductions in the risks associated with gastric cancer. Dr Metzger's study using the ileocolic segment suggests that this stomach substitute could reduce surgical antisepsis by Semmelweis and Lister in the longer term. It will be a better proposition.
