Breznitz,2014-07-30 Today universities around the world find themselves going beyond the traditional roles of research and teaching to drive the development of local economies through collaborations with industry At a time when regions with universities are seeking best practices among their peers Shiri M Breznitz argues against the notion that one university s successful technology transfer model can be easily transported to another Rather the impact that a university can have on its local economy must be understood in terms of its idiosyncratic internal mechanisms as well as the state and regional markets within which it operates To illustrate her argument Breznitz undertakes a comparative analysis of two universities Yale and Cambridge and the different outcomes of their attempts at technology commercialization in biotech By contrasting these two universities their unique policies organizational structure institutional culture and location within distinct national polities she makes a powerful case for the idea that technology transfer is dependent on highly variable historical and environmental factors Breznitz highlights key features to weigh and engage in developing future university and economic development policies that are tailor made for their contexts *High-Tech Entrepreneurship* Michel Bernasconi,Simon Harris,Mette Moensted,2013-01-11 High tech businesses form a crucial part of entrepreneurial activity in some ways presenting very typical examples of entrepreneurship yet in some ways representing quite different challenges The uncertainty in innovation and advanced technology makes it difficult to use conventional economic planning models and also means that the management skills used in this area must be more responsive to issues of risk uncertainty and evaluation than in conventional business opportunities Specifically focusing on the mix of theory and practice needed to accurately inform students the key topics covered include uncertainty and innovation entrepreneurial finance marketing technological innovations high tech incubation management Including case studies to give practical insights into genuine business examples this comprehensive book has a distinctly real world focus throughout Edited by a multi national team it draws together leading writers and researchers from across Europe making it a must read for all those involved in advanced entrepreneurship with specific interests in high tech start ups *A Handbook*
