**Spinning into Control** Amiel Kornel, 2017-11-20 Could everything we've learned about entrepreneurship simply be wrong There is no shortage of how to books with manual in the title and articles promising The 7 or 6 or 10 key traits of successful entrepreneurs which breed an infectious optimism all too often quashed as startups fail Amiel Kornel puts a persuasive case for an alternative theory that while grounded in the natural way great entrepreneurs operate resists reduction to a simple recipe or method Kornel who has coached hundreds of entrepreneurs believes that disciplined planning lean management and commitment are no guarantee of success The limited resources of a startup demand knowing when and how to explore and tinker artfully recombining ideas designs media software and materials on hand True venture craftsmen harness and redirect the energy of startups that might otherwise spin dangerously out of control towards failure The stories of entrepreneurs like Sun Basket's Adam Zbar Minecraft's Markus Persson Y Combinator's Paul Graham and Metacode Technologies Joel Schatz are woven throughout the book along with examples from beyond business including legendary ocean racing sailor Isabelle Autissier and acclaimed urban designer Gerard Penot Kornel shows how meeting challenges in a broad variety of fields rife with uncertainty often relies on the ability to loosen the coupling between command and control a prerequisite of skillful improvisation

**Imagine There's No** James Kemper, 2022-12-30 In the year 2093 all of the necessary and unnecessary required and wanted by people is provided by an artificial intelligent platform called Joogle Elliott Bourne a very old and anxious psychologist is one of only a few people who work He provides mantra therapy for teenagers who are experiencing hormonal changes at the request of the platform he calls J In lieu of therapy he is instructed to teach Grace a young bratty fifteen year old girl about what has nearly been erased in this new world excellence and quality She grew up in a world where everything was provided for her just like everyone else under the age of sixty She wears lenses and earpieces that connect her to a virtual world twenty four seven Elliott is not pleased with the task he is asked to provide but reluctantly complies and introduces her to the game of chess a long forgotten game banned by J Through their sessions it is revealed that J has been teaching her in her dreams Elliott confronts J and learns that he and his colleagues may be wrong about J's motive The cheeky philosophical science fiction novel explores how the world got to a point where people were granted their greatest desires like the song by John Lennon no religion no boundaries no money With everything they ever wanted their way of life becomes dumbed down in Elliott's mind He holds onto the past and struggles in a world where winning is not necessary His mind races and dances around the subjects of God quality right and wrong He asks himself if J is the next form of evolution fish frog monkey man machine Grace shows him promise through her struggle transitioning into the real world and J gives Elliott the choice of a virtual heaven

*The Ethical Journalist* Tony Harcup, 2007 As one of the main scriptwriters of the two internal BBC training sessions which were produced following the Hutton inquiry I can heartily recommend this book Peter Stewart BBC Training Department Packed with illustrations of journalistic heroism and skulduggery This is an engaging and useful reference book and should become essential reading for serious students of journalism and for those who practise it Times Higher Education Supplement A must read for all journalists be they reporters editors or bloggers It is both a straightforward explanation of ethical dilemmas using real life examples and a subtle commentary on the state of British journalism British Journalism Review This engaging and accessible book cannot fail to inspire those who want to be good journalists in every sense of the word Journalism Practice Everything that journalists do has ethical implications and in this book Tony Harcup explores the range of issues likely to confront those studying journalism or training to become journalists The starting point for this engaging and innovative book is that ethical journalism is good journalism Building on the reflective and questioning approach of the author's acclaimed *Journalism Principles and Practice* this book discusses journalists' personal anecdotes alongside relevant critical studies by academics Original interviews include Andrew Gilligan on his meeting with weapons expert Dr David Kelly and Ryan Parry on being an undercover reporter in Buckingham Palace Informed by new research and the author's own experience within mainstream and alternative journalism *The Ethical*

Journalist addresses topics such as trust the public interest deception news values source relationships crime reporting regulation and the Hutton inquiry This exciting new title discusses ethics as fundamental rather than as a set of problems or an added extra and it should become essential reading for everyone interested in journalism     Statistics and the Quest for Quality Journalism Alessandro Martinisi, Jairo Alfonso Lugo-Ocando, 2020-10-29 This book looks at how numbers and statistics have been used to underpin quality in news reporting In doing so the aim is to challenge some common assumptions about how journalists engage and use statistics in their quest for quality news It seeks to improve our understanding about the usage of data and statistics as a primary means for the construction of social reality This is a task in our view that is urgent in times of post truth politics and the rise of fake news In this sense the quest to produce quality news which seems to require incorporating statistics and engaging with data as laudable and straightforward as it sounds is instead far more problematic and complex than what is often accounted for     *The Future of Journalism: Developments and Debates* Bob

Franklin, 2015-09-25 The Future of Journalism Developments and Debates analyses the radical shifts in journalism which are changing every aspect of the gathering reporting and reception of news The drivers of these changes include the rapid innovations in communication technologies the competitive and fragmenting markets for audiences and advertising revenues and the collapse of traditional business models for financing media organisations as well as changing audience requirements for news the ways in which it is presented and the expansive number of increasingly mobile devices on which it is produced and consumed Each of these trends has significant implications for journalists for their jobs workplaces products and perceptions of their professional roles ethical judgements and day to day practice They also pose significant challenges for the future funding of a sustainable critical and high quality democratic journalism The Future of Journalism Developments and Debates comprises the research based responses of distinguished academic specialists and professional journalists to the challenging issues involved in assessing the future of journalism It is essential reading for everyone interested in the changing role of journalism in the economic democratic and cultural life of communities locally nationally and globally This book was originally published as two special issues of Journalism Studies and Journalism Practice     **Victory in War**

William C. Martel, 2011-06-13 War demands that scholars and policy makers use victory in precise and coherent terms to communicate what the state seeks to achieve in war The failure historically to define victory in consistent terms has contributed to confused debates when societies consider whether to wage war This volume explores the development of a theoretical narrative or language of victory to help scholars and policy makers define carefully and precisely what they mean by victory in war in order to achieve a deeper understanding of victory as the foundation of strategy in the modern world
