**Spirals** Walter L. Brenneeman, 1979      **Embodiment of Musical Creativity** Zvonimir Nagy, 2016-11-03 Embodiment of Musical Creativity offers an innovative look at the interdisciplinary nature of creativity in musical composition Using examples from empirical and theoretical research in creativity studies music theory and cognition psychology and philosophy performance and education studies and the author's own creative practice the book examines how the reciprocity of cognition and performativity contributes to our understanding of musical creativity in composition From the composer's perspective the book investigates the psychological attributes of creative cognition whose associations become the foundation for an understanding of embodied creativity in musical composition The book defines the embodiment of musical creativity as a cognitive and performative causality a relationship between the cause and effect of our experience when composing music Considering the theoretical practical contextual and pedagogical implications of embodied creative experience the book redefines aspects of musical composition to reflect the changing ways that musical creativity is understood and evaluated Embodiment of Musical Creativity provides a comparative study of musical composition in turn articulating a new perspective on musical creativity      *Northrop Frye and the Phenomenology of Myth* Glen Robert Gill, 2006-12-15 In Northrop Frye and the Phenomenology of Myth Glen Robert Gill compares Frye's theories about myth to those of three other major twentieth century mythologists C G Jung Joseph Campbell and Mircea Eliade Gill explores the theories of these respective thinkers as they relate to Frye's discussions of the phenomenological nature of myth as well as its religious literary and psychological significance Gill substantiates Frye's work as both more radical and more tenable than that of his three contemporaries Eliade's writings are shown to have a metaphysical basis that abrogates an understanding of myth as truly phenomenological while Jung's theory of the collective unconscious emerges as similarly problematic Likewise Gill argues Campbell's work while incorporating some phenomenological progressions settles on a questionable metaphysical foundation Gill shows how in contrast to these other mythologists Frye's theory of myth first articulated in *Fearful Symmetry* 1947 and culminating in *Words with Power* 1990 is genuinely phenomenological With excursions into fields such as literary theory depth psychology theology and anthropology Northrop Frye and the Phenomenology of Myth is essential to the understanding of Frye's important mythological work      Kū Kanaka—Stand Tall George S. Kanahale, 2021-05-25 Outstanding thinkers of the Western world are pulled into his creation adding luster interest and academic panache to this highly readable book      **Dwelling, Place and Environment** David Seamon, Robert Mugerauer, 2012-12-06 themes among the essays resurface and resonate Though our request for essays was broad and open ended we found that topics such as seeing authenticity interpretation wholeness care and dwelling ran as undercurrents throughout Our major hope is that each essay plays a part in revealing a larger whole of meaning which says much about a more humane relationship with places environments and the earth as our home Part I Beginnings and directions At the start we recognize the tremendous debt this

volume owes to philosopher Martin Heidegger 1890 1976 whose ontological excavations into the nature of human existence and meaning provide the philosophical foundations for many of the essays particularly those in Part I of the volume Above all else Heidegger was regarded by his students and colleagues as a master teacher He not only thought deeply but was also able to show others how to think and to question Since he perhaps more than anyone else in this century provides the instruction for doing a phenomenology and hermeneutic of humanity's existential situation he is seminal for phenomenological and hermeneutical research in the environmental disciplines He presents in his writings what conventional scholarly work especially the scientific approach lacks he helps us to evoke and understand things through a method that allows them to come forth as they are he provides a new way to speak about and care for our human nature and environment

**Like Letters in Running Water** Mary Aswell Doll, 2000-07 Explores ways in which fiction yields transformative insights for educational theory and practice

Change and Confusion in Catholicism Nathan R. Kollar, 2022-10-07 We live in a liminal time The anthropologist Victor Turner describes liminality as a time of severe disorientation for individuals and societies that lies between one stage of life and another All the former signposts that provided people with an identity are in a state of upheaval as they transit between these stages This book uses the lifelong personal and professional experiences of the author to analyse how Catholics experience liminality today and dealt with it yesterday It provides the reader with an historical case study of frightening experiences both in teaching what to expect during such a time and what to assume when it ends

*Megaliths and Lost Science* Learn Alchemical, 2025-08-20 Across windswept plains misty coasts and forgotten valleys stand the megaliths silent monuments of stone that defy time and explanation From the vast circles of Stonehenge and Carnac to the underground chambers of Malta from the spiraled carvings of Newgrange to the shattered blocks of Puma Punku these sites are more than ruins They are enigmas carved in granite whispering of a science we no longer understand For centuries archaeologists explorers and visionaries have asked Who built them and why Were these monuments primitive ritual centers or did they encode astronomical knowledge acoustic harmonics and geometric principles lost to history Why do so many cultures separated by oceans share spirals cup marks and sacred orientations toward the stars Could sound itself have been a forgotten tool shaping stone and altering consciousness In *Megaliths and Lost Science* the stones are not treated as mute relics but as active archives of ancient memory This book journeys through spirals and symbols echo chambers and alignments myths and suppressed discoveries uncovering how these monuments may have preserved fragments of a forgotten world science Drawing upon archaeology archaeoastronomy mythology and emerging fields such as archaeoacoustics and cymatics it challenges orthodox timelines while grounding its insights in cross cultural comparisons and hard data Both rigorous and provocative this work invites readers into the great debate between mainstream history and alternative visions of the past It explores how colonialism and academic orthodoxy have shaped the way we interpret sacred sites and how new technologies satellite mapping genetic research acoustic testing

are reawakening questions long dismissed This is not a book of simple answers but of necessary questions The megaliths endure because they were built on more than stone They were tuned to resonance aligned with the heavens and infused with meaning Their silence is deceptive for those who listen carefully the stones still speak

*Whitaker's Cumulative Book List*, 1983 **The Seeing Eye** Walter L. Brenneeman, Stanley O. Yarian, Alan M. Olson, 1982 Establishing a link between phenomenology and hermeneutics as seen by philosophers notably Heidegger and Husserl and as applied by students of religion notably Eliade and van der Leeuw is the pioneering aim of this book No existing book ties together the cross disciplinary strands in a way that is useful for religious studies A phenomenological and therefore hermeneutical approach to religion prides itself on being aware of its own presuppositions and those of others that are brought to bear on data to be interpreted Thus it seeks to gain an access to the religious worlds of other peoples in as pure a form as possible Phenomenological hermeneutics differs from the traditional comparative study of religion in an important way the new method attempts an empathic understanding of religious experiences before making any comparisons or drawing any inferences Part I shows how the phenomenological approach must arise from a crisis of doubt within the prevailing tradition It goes on to compare this approach to the mystics understanding of the scope and limitations of rational consciousness contrasting it with the nominalists dichotomy between faith and reason Part II starts with Eliade's creative hermeneutics which holds that an object or an act becomes real only insofar as it imitates or repeats an archetype

particularly the archetype of the sacred It goes on to develop Cassirer's point that myth is a particular way of seeing Part III starts by showing how art like religion is an imitation of an archetype It goes on to apply hermeneutical phenomenology to the interpretation of ritual Ritual gesture Chapter 6 argues thematizes the world establishing a mystical symbolic relationship between body and world the seen and the unseen Part III continues with a critique of the writings of Carlos Castaneda arguing that these contain the symbolic elements of both archaic shamanism and classical mysticism The final chapter treats the three tiered cosmos that is universal in folklore the tier of family home land artifacts the tier of clan tribe nation and the tier of weather seasons natural forces Each tier has its loric power and these powers are united by shamans and mystics in one sacred kingdom of power
