Yanantin and Masintin in the Andean World Hillary S. Webb, 2012 Yanantin and Masintin in the Andean World is an eloquently written autoethnography in which researcher Hillary S Webb seeks to understand the indigenous Andean concept of yanantin or complementary opposites One of the most well known and defining characteristics of indigenous Andean thought yanantin is an adherence to a philosophical model based on the belief that the polarities of existence such as male female dark light inner outer are interdependent and essential parts of a harmonious whole Webb embarks on a personal journey of understanding the yanantin worldview of complementary duality through participant observation and reflection on her individual experience Her investigation is a thoughtful careful and rich analysis of the variety of ways in which cultures make meaning of the world around them and how deeply attached we become to our own culturally imposed meaning making strategies

Local Histories/global Designs Walter Mignolo, 2012-08-26 Local Histories Global Designs is an extended argument about the coloniality of power In a shrinking world where sharp dichotomies such as East West and developing developed blur and shift Walter Mignolo points to the inadequacy of current practices in the social sciences and area studies

Local Histories/Global Designs Walter D. Mignolo, 2000-01-17 This book is an extended argument on the coloniality of power by one of the most innovative scholars of Latin American studies In a shrinking world where sharp dichotomies such as East West and developing developed blur and shift Walter Mignolo points to the inadequacy of current practice in the social sciences and area studies He introduces the crucial notion of colonial difference into study of the modern colonial world He also traces the emergence of new forms of knowledge which he calls border thinking Further he expands the horizons of those debates already under way in postcolonial studies of Asia and Africa by dwelling in the genealogy of thoughts of South Central America the Caribbean and Latino as in the United States His concept of border gnosis or what is known from the perspective of an empire's borderlands counters the tendency of occidental perspectives to dominate and thus limit understanding The book is divided into three parts the first chapter deals with epistemology and postcoloniality the next three chapters deal with the geopolitics of knowledge the last three deal with the languages and cultures of scholarship Here the author reintroduces the analysis of civilization from the perspective of globalization and argues that rather than one civilizing process dominated by the West the continually emerging subaltern voices break down the dichotomies characteristic of any cultural imperialism By underscoring the fractures between globalization and mundializacion Mignolo shows the locations of emerging border epistemologies and of post occidental reason In a new preface that discusses Local Histories Global Designs as a dialogue with Hegel's Philosophy of History Mignolo connects his argument with the unfolding of history in the first decade of the twenty first century

Nature and Culture in the Andes Daniel W. Gade, 1999 Essays describe how the Andean Indians respond to environmental conditions and the plants and animals with which they live

Nature and Culture Sarah Pilgrim, Jules N. Pretty, 2010-09-23 There is a growing recognition that the diversity of life

comprises both biological and cultural diversity But this division is not universal and in many cases has been deepened by the common disciplinary divide between the natural and social sciences and our apparent need to manage and control nature This book goes beyond divisive definitions and investigates the bridges linking biological and cultural diversity The international team of authors explore the common drivers of loss and argue that policy responses should target both forms of diversity in a novel integrative approach to conservation thus reducing the gap between science policy and practice While conserving nature alongside human cultures presents unique challenges this book forcefully shows that any hope for saving biological diversity is predicated on a concomitant effort to appreciate and protect cultural diversity

Subversive Spiritualities Frederique Apffel-Marglin, 2011-11-15 In this book Frederique Apffel Marglin draws on a lifetime of work with the indigenous peoples of Peru and India to support her argument that the beliefs values and practices of such traditional peoples are eco metaphysically true
