**Currents in Western Environmental Thought** Peter Hay, 2002-02-21 Professor Hay environmental studies U of Tasmania must have been a patient and long time follower of environmental debate over the last 35 years to have masterfully untangled the myriad and subtle contentions and changes of heart in ecophilosophy ecofeminism ecoreligiosity and spirituality green critiques of science green politics philosophies of place and ecology s relationship to democracy and postmodernism Hay s Tasmanian provenance seems less weakness than strength since he provides a more international perspective on environmentalism that includes Australia North America and Europe Not only geographically wide ranging Hay is ideologically inclusive bringing into the environmental forum without apology or pride discussions among animal rightists and their critics and assertions that environmental concern is partially pre rational Reading Hay s environmental tome is likely to introduce even seasoned readers to new names Deborah Slicer John Rodman Warwick Fox Stephen Clark Ariel Salleh and so new arguments Suitable as a primary or secondary text for an advanced undergraduate or graduate class in environmental thought Annotation copyrighted by Book News Inc Portland OR *Religion and the Environment* R. Tanner, C. Mitchell, 2016-06-03 This book is an analysis of the whole frontier between religion and the environment It deals in turn with their interactions and the effects of each on the other in the major world religions It considers the religious impact on human uses of time space materials transport and foods and the environmental effects of religious influence on major topics such as population pressures morbidity mortality marital arrangements contraception the treatment of animals and environmental management **Loving Nature** Kay Milton, 2003-09-01 As the full effects of human activity on Earth s life support systems are revealed by science the question of whether we can change fundamentally our relationship with nature becomes increasingly urgent Just as important as an understanding of our environment is an understanding of ourselves of the kinds of beings we are and why we act as we do In *Loving Nature* Kay Milton considers why some people in Western societies grow up to be nature lovers actively concerned about the welfare and future of plants animals ecosystems and nature in general while others seem indifferent or intent on destroying these things Drawing on findings and ideas from anthropology psychology cognitive science and philosophy the author discusses how we come to understand nature as we do and above all how we develop emotional commitments to it Anthropologists in recent years have tended to suggest that our understanding of the world is shaped solely by the culture in which we live Controversially Kay Milton argues that it is shaped by direct experience in which emotion plays an essential role The author argues that the conventional opposition between emotion and rationality in western culture is a myth The effect of this myth has been to support a market economy which systematically destroys nature and to exclude from public decision making the kinds of emotional attachments that support more environmentally sensitive ways of living A better understanding of ourselves as fundamentally emotional beings could give such ways of living the respect they need **Representations and Rights of the Environment** Sandy Lamalle, Peter Stoett, 2023-04-06 Attending to the Cry of the Earth requires a critical appraisal of how we conceive our

relationship with the environment and a clear vision of how to apprehend it in law and governance Addressing questions of participation responsibility and justice this collective endeavour includes marginalised and critical voices featuring contributions by leading practitioners and thinkers in Indigenous law traditional knowledge wild law the rights of nature theology public policy and environmental humanities Such voices play a decisive role in comprehending and responding to current global challenges They invite us to broaden our horizon of meaning and action modes of knowing and being in the world and envision the path ahead with a new legal consciousness A valuable reference for students researchers and practitioners this book is one of a series of publications associated with the Earth System Governance Project For more publications see [www.cambridge.org/earth-system-governance](http://www.cambridge.org/earth-system-governance) *Christianity and Ecological Theology* E. M.

Conradie,2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa **Environmental Constitutionalism**

**in the Anthropocene** Domenico Amirante,Silvia Bagni,2022-04-03 This book examines the relationship between man and nature through different cultural approaches to encourage new environmental legislation as a means of fostering acceptance at a local level In 2019 the International Union of Geological Sciences IUGS recognised that we have entered a new era the Anthropocene specifically characterised by the impact of one species mankind on environmental change The Anthropocene is penetrating the discourse of both hard sciences and humanities and social sciences by posing new epistemological as well as practical challenges to many disciplines Legal sciences have so far been at the margins of this intellectual renewal with few contributions on the central role that the notion of Anthropocene could play in forging a more effective and just environmental law By applying a multidisciplinary approach and adopting a Law as Culture paradigm to the study of law this book explores new paths of investigation and possible solutions to be applied New perspectives for the constitutional framing of environmental policies rights and alternative methods for bottom up participatory law making and conflict resolution are investigated showing that environmental justice is not just an option but an objective within reach The book will be essential reading for students academics and policymakers in the areas of law environmental studies and anthropology *The*

*Psychology of Environmental Law* Arden Rowell,Kenworthy Bilz,2021-02-16 Offers psychological insights into how people perceive respond to value and make decisions about the environment Environmental law may seem a strange space to seek insights from psychology Psychology after all seeks to illuminate the interior of the human mind while environmental law is fundamentally concerned with the exterior surroundings the environment in which people live Yet psychology is a crucial undervalued factor in how laws shape people s interactions with the environment Psychology can offer environmental law a rich empirically informed account of why when and how people act in ways that affect the environment which can then be

used to more effectively pursue specific policy goals When environmental law fails to incorporate insights from psychology it risks misunderstanding and mispredicting human behaviors that may injure or otherwise affect the environment and misprescribing legal tools to shape or mitigate those behaviors The Psychology of Environmental Law provides key insights regarding how psychology can inform explain and improve how environmental law operates It offers concrete analyses of the theoretical and practical payoffs in pollution control ecosystem management and climate change law and policy when psychological insights are taken into account

**Global Environmental History** Ian G Simmons,2008-03-05 Courses which deal with environmental history have long lacked a comprehensive overview I G Simmons has made a significant contribution with a book that looks at the long term history of environment and humanity from 10 000 BC to AD 2000 This far reaching text considers the global picture and recognises the contributions of many disciplines including the natural sciences the social sciences and increasingly the humanities As a starting point this book takes the major phases of human technological evolution of the last 12 000 years and considers how these have affected the natural world It then considers the response to conditions such as climate change putting today s preoccupations into a long term perspective This is a book of history not prophecy and so makes no judgements on current anxieties

*The Ethics of Nature* Celia Deane-Drummond,2008-04-15 This accessible and timely book uses a Christian perspective to explore ethical debates about nature A detailed exploration of humanity s treatment of the natural world from a Christian perspective Covers a range of ethical debates including current controversies about the environment animal rights biotechnology consciousness and cloning Sets the immediate issues in the context of underlying theological and philosophical assumptions Complex scientific issues are explained in clear student friendly language The author develops her own distinctive ethical approach centred on the practice of wisdom Discusses key figures in the field including Peter Singer Aldo Leopold Tom Regan Andrew Linzey James Lovelock Anne Primavesi Rosemary Radford Ruether and Michael Northcott The author has held academic posts in both theology and plant science

**Environmental Management and Development** Christopher J. Barrow,2005 The environment and its management has been and continues to be a very topical issue Existing environment and development texts place emphasis is on listing problems making warnings and voicing advocacy but by focusing on environmental management this informative book offers a very different perspective Moving on from the usual much discussed viewpoints Barrow looks towards practical management and problem solving techniques He clarifies the definition nature and role of environmental management in development and developing countries beginning with an introduction to the key terms issues and tools of environmental management which are linked and developed in later chapters and concluding by discussing who pays for environmental management and its future in developing countries Written by an experienced and well known author this clear user friendly book ideal for students of resource management geography and development studies makes excellent use of chapter summaries boxed case studies annotated further readings and websites discussion questions and illustrations

*Environmental Movements of India* Krishna Mallick, 2025-10-01 In her detailed retelling of three iconic movements in India Professor Emerita Krishna Mallick PhD gives hope to grassroots activists working toward environmental justice Each movement deals with a different crisis and affected population Chipko famed for tree hugging women in the Himalayan forest Narmada for villagers displaced by a massive dam and Navdanya for hundreds of thousands of farmers whose livelihoods were lost to a compact made by the Indian government and neoliberal purveyors of genetically modified organisms GMOs Relentlessly researched *Environmental Movements of India* Chipko Narmada Bachao Andolan Navdanya presents these movements in a framework that explores Hindu Vedic wisdom as well as Development Ethics Global Environment Ethics Feminist Care Ethics and the Capability Approach At a moment when the climate threatens populations who live closest to nature and depend upon its fodder for heat its water for life and its seeds for food Mallick shows how nonviolent action can give poor people an effective voice

*Environmental Philosophy* Simon P. James, 2015-06-03 Climate change habitat loss rising extinction rates such problems call for more than just new policies and practices They raise fundamental questions about the world and our place in it What for instance is the natural world Do we humans belong to it Which parts of it are we morally obliged to protect Drawing on an exceptionally wide range of sources from virtue ethics to Buddhism leading environmental philosopher Simon P James sets out to answer these vitally important questions The book begins with a discussion of animal minds before moving on to explore our moral relations with non human organisms ecosystems and the earth as a whole James then considers environmental aesthetics humanity's place in the natural world and the question of what it means to be wild In the concluding chapter he applies his findings to the topic of global climate change building a strong moral case for urgent action This accessible entertainingly written book will be essential reading for students of the environment across the humanities and social sciences It will moreover be an ideal guide for anyone keen to deepen their understanding of environmental issues

*Environmental Management for Sustainable Development* Chris Barrow, 2006-09-27 Environmental management is a wide expanding and rapidly evolving field affecting everyone from individual citizens to businesses governments to international agencies Indisputably it plays a crucial role in the quest for sustainable development This comprehensively updated second edition explores the nature and role of environmental management covering key principles practices tools strategies and policies offers a thorough yet understandable introduction and points to further in depth coverage Among the key themes covered are sustainable development proactive approaches the precautionary principle the polluter pays principle the need for humans to be less vulnerable and more adaptable Reflecting the expansion and evolution of the field this revised edition focuses strongly on sustainable development There has been extensive restructuring to ensure the book is accessible to those unfamiliar with environmental management and it now includes greater coverage of topics including key resources under stress environmental management tools climate change and urban environmental management With rapid expansion and development of the subject it is easy for those embarking on
