## Spits And Bars:

**Spits and Bars** Maurice L. Schwartz,1973      *Advanced Geography for AQA Specification A* Ann Bowen,John Pallister,2001 Written for the AQA geography specification A this text develops skills analysis in context through the use of map extracts and satellite data It incorporates ICT and questions to reinforce learning Sample exam questions and mark schemes give pupils practice      Living with the Puerto Rico Shore David M. Bush,1995 In this the eighteenth title in Duke University Press s Living With the Shore series the authors present a user s guide to the coastal zone of Puerto Rico Presenting a geological appraisal of the history dynamics and hazards of the island s coastline Living With the Puerto Rico Shore is the first in the series to examine a tropical region and the first to examine an area outside the continental United States The book provides detailed descriptions of the entire shoreline noting the specific coastal hazards of each coastal reach These hazards include coastal erosion storm surge flooding and potential damage from earthquakes Where high density development or significant roads and utilities are particularly at risk these are also noted The effects that sand mining seawalls jetties and other attempts at coastal engineering have had on the island are examined Finally the authors discuss historical and legal aspects of coastal planning in Puerto Rico presenting guidelines for selecting building sites Of interest to all concerned with protecting our shores and beaches and useful to the coastal planner and manager Living With the Puerto Rico Shore contains an extensive bibliography and a list of agencies involved in coastal issues      Sand and Gravel Spits Giovanni Randazzo,Derek W.T. Jackson,J. Andrew G. Cooper,2015-04-16 This book draws together a series of studies of spit geomorphology and temporal evolution from around the world The volume offers some unique insights into how these landforms are examined scientifically and how we as humans impact them offering a global perspective on spit genesis and evolution Spits are unique natural environments whose evolution is linked to the adjacent coast and near shore morphology sediment supply coastal dynamics and sea level change Over the past century Global Mean Sea Level GMSL has risen by 10 to 20 centimetres and many coastal spits represent the first sentinel against coastal submersion Scientific research indicates that sea levels worldwide have been rising at a rate of 3 5 millimetres per year since the early 1990s roughly twice the average speed of the preceding 80 years This trend linked to global warming will undoubtedly cause major changes in spit morphology Spits are highly mobile coastal landforms that respond rapidly to environmental change They therefore represent a signature of past environmental change and provide a landform indicator of climate change
