Splintering Urbanism Networked Infrastructures Technological Mobilities And The Urban Condition:

Splintering Urbanism Stephen Graham, Simon Marvin, 2001 This text offers an international and interdisciplinary analysis of the complex interactions between infrastructure networks and urban spaces Drawing on case studies and examples from across the globe it offers a statement on the urban condition

Handbook of Urban Mobilities Ole B. Jensen, Claus Lassen, Vincent Kaufmann, Malene Freudendal-Pedersen, Ida Sofie Gøtzsche Lange, 2020-05-18 This book offers the reader a comprehensive understanding and the multitude of methods utilized in the research of urban mobilities with cities and the urban as its pivotal axis It covers theories and concepts for scholars and researchers to understand observe and analyse the world of urban mobilities The Handbook of Urban Mobilities facilitates the understanding of urban mobilities within a historic conscience of societal transformation It explores key concepts and theories within the mobilities turn with a particular urban framework as well as the methods and tools at play when empirical urban mobilities research is undertaken This book also explores the urban mobilities practices related to commutes particular modes of moving the exploration of everyday life and embodied practices as they manifest themselves within urban mobilities and the themes of power conflict and social exclusion A discussion of urban planning public control and governance is also undertaken in the book wherein the themes of infrastructures technologies and design are duly considered With chapters written in an accessible style this handbook carries timely contributions within the contemporary state of the art of urban mobilities research It will thus be useful for academics and students of graduate programmes and post graduate studies within disciplines such as urban geography political science sociology anthropology urban planning traffic and transportation planning and architecture and urban design

Mobilities: New Perspectives on Transport and Society John Urry, 2016-04-22 Bringing together the leading authors currently working at the intersection of social science and transport science this volume provides a companion to the well established and extensive international Transport and Society series Each chapter and the volume as a whole offers closer and richer consideration of the issues practices and structures of multiple mobilities which shape the current world but which have typically been overlooked or minimised What this approach seeks to do is not only draw attention to many new areas of research and investigation relating to mobile lives but also to point to new theories and methods by which such lives have to be researched and examined Such new theories and methods are relevant both to rethinking transport studies as such but are also recasting societal studies as transport so that it comes out of the ghetto and enters mainstream social science

Staging Mobilities Ole B. Jensen, 2013 This text is about the fact that mobility is more than movement between point A and B It concerns how the movement of people goods information and signs influences human understandings of self other and the built environment

Post-Socialist Urban Infrastructures (OPEN ACCESS) Tauri Tuvikene, Wladimir Sgibnev, Carola S. Neugebauer, 2019-05-15 Post Socialist Urban Infrastructures critically elaborates on often forgotten but some of the most essential aspects of contemporary urban life namely infrastructures and links them to a discussion of post

socialist transformation As the skeletons of cities infrastructures capture the ways in which urban environments are assembled and urban lives unfold Focusing on post socialist cities marked by neoliberalisation polarisation and hybridity this book offers new and enriching perspectives on urban infrastructures by centering on the often marginalised aspects of urban research transport green spaces and water and heating provision Featuring cases from West and East alike the book covers examples from Azerbaijan Bulgaria Serbia Croatia Germany Russia Georgia Lithuania Poland the Czech Republic Tajikistan and India It provides original insights into the infrastructural back end of post socialist cities for scholars planners and activists interested in urban geography cultural and social anthropology and urban studies **Planning Cities in Africa**

Mobility Justice Mimi Sheller,2018-09-25 Mobility justice is one of the crucial political and ethical issues of our day We are in the midst of a global climate crisis and experiencing the extreme challenges of urbanization In *Mobility Justice* Mimi Sheller makes a passionate argument for a new understanding of the contemporary crisis of movement Sheller shows how power and inequality inform the governance and control of movement She connects the body street city nation and planet in one overarching theory of the modern perpetually shifting world Concepts of mobility are examined on a local level in the circulation of people resources and information as well as on an urban scale with questions of public transport and the right to the city On the planetary level she demands that we rethink the reality where tourists and other elites are able to roam freely while migrants and those most in need are abandoned and imprisoned at the borders *Mobility Justice* is a new way to understand the deep flows of inequality and uneven accessibility in a world in which the mobility commons have been enclosed It is a call for a new understanding of the politics of movement and a demand for justice for all Traces of a

Mobile Field James R Faulconbridge,Allison Hui,2017-10-02 This agenda setting collection critically reflects upon a decade of contributions to the social scientific mobilities turn in order to propose new trajectories for the future of this interdisciplinary research field The chapters are all exemplars of how the past decade of research has opened up new insights into the place of mobilities in societies They also highlight how attempts to look forward towards new conversations understandings and interventions in a mobile world will emerge from the transformations invoked by this field of research Authors foreground issues of power interdisciplinarity transformative technologies fragmented discourses and changing social processes whilst addressing automobility aeromobility tourism communications technologies urban infrastructures migration and emergencies As a whole the collection raises important questions about not only how understandings of mobilities are changing but also how the field of mobilities research is itself on the move The evocative empirical cases and provocative arguments in this

book thus highlight the necessity of new concepts conversations methods empirical studies and interventions to address transformations in both the complex mobilities of social worlds and what is examined or taken for granted in mobilities research itself This book was originally published as a special issue of Mobilities **Sustainable Infrastructure for Cities and Societies** Michael Neuman, 2021-12-30 The central role of infrastructure to cities and in particular their sustainability is essential for proper planning and design since most energy and materials are themselves consumed by or through infrastructures Moreover infrastructures of all types affect matters of economic and social equity due to access that they provide or prevent Sustainable Infrastructure for Cities and Societies shows how fundamental planning design finance and governance principles can be adapted for sustainable infrastructure to provide solutions to make cities significantly more sustainable By providing a contemporary overview on infrastructure cities planning economies and sustainability the book addresses how to plan design finance and manage infrastructure in ways that reduce consumption and harmful impacts while maintaining and improving life quality It considers the interrelationships between the economic political societal and institutional frameworks providing an integrative approach including livability and sustainability principles and practice and planning and design It further translates these approaches that professionals policymakers and leaders can use This approach gives the book wide appeal for students researchers and practitioners hoping to build a more sustainable world

Key Thinkers on Space and Place Mary Gilmartin, Phil Hubbard, Rob Kitchin, Sue Roberts, 2024-05-11 Space and place are at the heart of how geographers and sociologists think This updated edition of the essential undergraduate text will introduce you to the most influential thinkers in the tradition of social theory with a new focus on the past fifty years This book is designed to engage with theoretical debates in human geography through the individuals who have made the most significant contributions to this field This will show you how ideas are shaped by contexts and how those ideas in turn effect change This book shows how theoretical understandings evolve shift and change It also highlights the connections between different thinkers whose ideas are developed in collaboration with or in reaction to others Spatial thought is never developed in a vacuum but is always constructed by individuals and groups of people located in particular institutional and social structures with their own sets of personal and political beliefs The biographical approach of this book reveals how individual thinkers draw on a rich legacy of ideas from past and contemporary generations With increased coverage of international and female thinkers as well as those who work against Eurocentric notions of space and place this book reveals the exciting reorientation of Geography towards new ideas and methods in the last decade Each entry contextualises its subject within on going inter disciplinary debates and important political moments as well as highlighting connections between different thinkers Together the chapters uncover the rich and diverse evolution of social theory equipping you with the foundational ideas of geographical thought Each entry offers the following components i a short biography ii an explanation of ideas iii an exploration of how their ideas have been used and critiqued iv a selective bibliography of key publications and key

publications which review or critique **The Role of Sharing Mobility in Contemporary Cities** Guido Smorto, Ignazio Vinci, 2020-11-02 The emergence of sharing mobility is having a profound impact on urban landscapes In fact it is deeply affecting the traditional organization of local services by calling into question how urban transportation is planned and by redesigning city spaces Further by connecting people to shared assets services or both sharing mobility is poised to facilitate the more efficient use of underutilized resources becoming a powerful tool for economic growth and social inclusion while also contributing to sustainability That being said the economic social and spatial impacts of sharing mobility have not been sufficiently investigated and so far the evidence is mixed From a normative standpoint while it is relevant to better understand the relations between sharing mobility the city and the environment it is also of crucial importance to define new policies and sound rules for sharing mobility in urban areas Against this backdrop this book adopts a multidisciplinary perspective to explore the role that sharing mobility can play in the creation of more just and sustainable cities

Mobilising Place Management Claus Lassen, Lea Holst Laursen, 2020-11-12 Mobilising Place Management makes an important contribution to the mobilities field by arguing for the need to rethink place management It takes a point of departure in the mobilities turn and relational place thinking while exploring the relationship between place and mobility In a world of increasing mobility and global competition between nations cities and urban regions the managing of places seems more relevant than ever before By examining various examples of place and mobilities that range from the airport rural village tourist site port city to the city region this book argues that the management of places can be informed and enhanced by installing a greater awareness and understanding of mobility This insight could potentially improve the ability of current place management to translate a relational and mobilities orientated thinking into concrete actions instructions interventions designs plans policies and management control systems The book will be essential reading for researchers practitioners and students in the field of place management and across urban studies planning design geography sociology tourism transport and history **Urban Headway and Upward Mobility in India** Arup Mitra, 2020-10-29 Focuses on various aspects of urbanisation in India and its impact on socio economic variables
