Marcus,2017-11-20 This book uses a corpus of manuscript letters from Bess of Hardwick to investigate how linguistic features characteristic of spoken communication function within early modern epistolary prose Using these letters as a primary data source with reference to other epistolary materials from the early modern period 1500 1750 the author examines them in a unique and systematic way The book is the first of its kind to combine a replicable scribal profiling technique used to identify holograph and scribal handwriting within the letters with innovative analyses of the language they contain Furthermore by adopting a discourse analytic approach to the language and making reference to the socio historical context of language use the book provides an alternative perspective to the one often presented in traditional historical accounts of English This volume will appeal to students and scholars of early modern English and historical linguistics In Conversation with Jonah Raymond F. Person,1996-01-01 **Fluency and Its Teaching** Marie-Noëlle Guillot,1999-01-01 We

can all recognize fluency and practice it but often do not understand what linguistic and paralinguistic operations are involved This text tries to solve this puzzle It begins by exploring perceptions of fluency to understand their common denominators It goes on to pinpoint the specific features which promote fluency while emphasizing its relative and interactional nature These analyses produce both a methodological framework and a pedagogical strategy illustrated by sample classroom activities Language teachers applied linguists linguists and their students should find this book an accessible companion to the teaching and study of oral language with French as its domain of application **Discourse**

**Perspectives on English** Risto Hiltunen,Janne Skaffari,2003-12-19 Covering nearly one thousand years this volume explores medieval and modern English texts from fresh perspectives Within the relatively new field of historical discourse linguistics the synchronic analysis of large textual units and consideration of text external features in relation to discourse has so far received little attention To fill that gap this volume offers studies of medieval instructional and religious texts and correspondence from the early modern period The contributions highlight writer audience relationships the intended use of texts descriptions of text type and questions of orality and manuscript contextualization The topics ranging from the reception of Old English texts to the conventions of practical instruction in Middle English to the epistolary construction of science in early Modern English are directly relevant to historical linguists discourse and text linguists and students of the history of English *Linguistic Descriptions of the Greek New Testament* Stanley E. Porter,2023-08-10 Stanley E Porter provides descriptions of various important topics in Greek linguistics from a Systemic Functional Linguistics SFL perspective an approach that has been foundational to Porter s long and influential career in the field of New Testament Greek Deep insights into Porter s understanding of SFL are displayed throughout based either upon how he positions SFL in relation to

other linguistic models or how he utilizes it to describe topics within Greek and New Testament studies Porter reflects on his core approach to the Greek New Testament by exploring subjects such as metaphor rhetoric cognition orality and textuality as well as studies on linguistic schools of thought and traditional grammar [A Bibliography on Writing and Written Language](#) Konrad Ehlich, Florian Coulmas, Gabriele Graefen, 2011-06-01 The bibliography offers information on research about writing and written language over the past 50 years No comprehensive bibliography on this subject has been published since Sattler's 1935 handbook With a selection of some 27 500 titles it covers the most important literature in all scientific fields relating to writing Emphasis has been placed on the interdisciplinary organization of the bibliography creating many points of common interest for literacy experts educationalists psychologists sociologists linguists cultural anthropologists and historians The bibliography is organized in such a way as to provide the specialist as well as the researcher in neighboring disciplines with access to the relevant literature on writing in a given field While necessarily selective it also offers information on more specialized bibliographies In addition an overview of norms and standards concerning script and writing will prove very useful for non professional readers It is therefore also of interest to the generally interested public as a reference work for the humanities

**Gospel Media** Nicholas A. Elder, 2024-01-04 Contextualizing the gospels in ancient Greco Roman media practices New Testament scholars have often relied on outdated assumptions for understanding the composition and circulation of the gospels This scholarship has spread myths or misconceptions about how the ancients read wrote and published texts Nicholas Elder updates our knowledge of the gospels media contexts in this myth busting academic study Carefully combing through Greco Roman primary sources he exposes what we take for granted about ancient reading cultures and offers new and better ways to understand the gospels These myths include claims that ancients never read silently and that the canonical gospels were all the same type of text Elder then sheds light on how early Christian communities used the gospels in diverse ways Scholars of the gospels and classics alike will find Gospel Media an essential companion in understanding ancient media cultures

*Third Person References* Jenny Dumont, 2016-02-03 This volume a case study on the grammar of third person references in two genres of spoken Ecuadorian Spanish examines from a discourse analytic perspective how genre affects linguistic patterns and how researchers can look for and interpret genre effects This marks a timely contribution to corpus linguistics as many linguists are choosing to work with empirical data Corpus based approaches have many advantages and are useful in the comparison of different languages as well as varieties of the same language but what is often overlooked in such comparisons is the genre of language under examination As this case study shows genre is an important factor in interpreting patterns and distributions of forms The book also contributes toward theories of anaphora referentiality and Preferred Argument Structure It is relevant for scholars who work with referentiality genre differences third person references and interactional linguistics as well as those interested in Spanish morphosyntax

*The Rhetoric of Religious Cults* A. Mooney, 2005-08-02 The Rhetoric of Religious Cults takes as its

departure point the notion that cults have a distinctive language and way of recruiting members First outlining a rhetorical framework which encompasses contemporary discourse analysis the persuasive texts of three movements Scientology Jehovah s Witnesses and Children of God are analysed in detail and their discourse compared with other kinds of recruitment literature Cults distinctive negative profile in society is not matched by a linguistic typology Indeed this negative profile seems to rest on the semantics and application of the term cult itself From Orality to Orality James A. Maxey,2009-09-15 In this groundbreaking work Bible translation is presented as an expression of contextualization that explores the neglected riches of the verbal arts in the New Testament Going beyond a historical study of media in antiquity this book explores a renewed interest in oral performance that informs methods and goals of Bible translation today Such exploration is concretized in the New Testament translation work in central Africa among the Vute people of Cameroon This study of contextualization appreciates the agency of local communities particularly in Africa who seek to express their Christian faith in response to anthropological pauperization An extended analysis of African theologians demonstrates the ultimate goals of contextualization liberation and identity Oral performance exploits all the senses in experiencing communication while performer text and audience negotiate meaning Performance not only expresses but also shapes identity as communities express their faith in varied contexts This book contends that the New Testament compositions were initially performed and not restricted to individualized silent reading This understanding encourages a reexamination of how Bible translation can be done Performance is not a product but a process that infuses biblical studies with new insights methods and expressions
