Indigenous Language Acquisition, Maintenance, and Loss and Current Language Policies Okamura, Toru, Kai,

Masumi,2020-08-28 The world's linguistic map has changed in recent years due to the vast disappearance of indigenous languages. Many factors affect the alteration of languages in various areas of the world including governmental policies, education, and colonization. As indigenous languages continue to be affected by modern influences, there is a need for research on the current state of native linguistics that remain across the globe. *Indigenous Language Acquisition, Maintenance, and Loss and Current Language Policies* is a collection of innovative research on the diverse policies, influences, and frameworks of indigenous languages in various regions of the world. It discusses the maintenance, attrition, or loss of the indigenous languages, language status in the society, language policies, and the grammatical characteristics of the indigenous language that people maintained and spoke. This book is ideally designed for anthropologists, language professionals, linguists, cultural researchers, geographers, educators, government officials, policymakers, academicians, and students. **The Language Hoax** John H. McWhorter, 2014. Japanese has a term that covers both green and blue. Russian has separate terms for dark and light blue. Does this mean that Russians perceive these colors differently from Japanese people? Does language control and limit the way we think? This short opinionated book addresses the Sapir-Whorf hypothesis which argues that the language we speak shapes the way we perceive the world. Linguist John McWhorter argues that while this idea is mesmerizing, it is plainly wrong. It is language that reflects culture and worldview, not the other way around. The fact that a language has only one word for eat, drink, and smoke doesn't mean its speakers don't process the difference between food and beverage, and those who use the same word for blue and green perceive those two colors just as vividly as others do. McWhorter shows not only how the idea of language as a lens fails, but also why we want so badly to believe it. We're eager to celebrate diversity by acknowledging the intelligence of peoples who may not think like we do. Though well intentioned, our belief in this idea poses an obstacle to a better understanding of human nature and even trivializes the people we seek to celebrate. The reality that all humans think alike provides another better way for us to acknowledge the intelligence of all peoples.
