**Holland Real Estate Year Book 2008** ,2008      *CSR and Codes of Business Ethics in the USA, Austria (EU) and China and their Enforcement in International Supply Chain Arbitrations* Adolf Peter,2021-02-23 This book analyzes the implementation of CSR reporting and codes of business conduct and ethics in the legal systems of the USA Austria and China and their enforcement in international supply chain arbitrations The book demonstrates that long term profit maximization is increasingly intertwined with corporate ethics and CSR policies In order to prevent window dressing and greenwashing certain control mechanisms and legal standards are required along the entire supply chain This book introduces an ethics and CSR system recommending a reward based whistleblowing mechanism internal oversight by a CSR and Ethics Committee comprised of independent board members and at least one sustainability expert and an external independent and comprehensive assurance of CSR reports provided by auditing firms or newly formed governmental agencies consisting of certified CSR experts The author emphasizes the significance for supply chain leaders to ensure contractual enforcement of their codes of business ethics and conduct along the supply chain Against this background the author created a comprehensive fictitious case scenario covering a supply chain dispute arising from the breach of the supply chain leader s code of business conduct and ethics by a lower tier supply chain member The author acknowledges the fact that in most of the cases the governing law of international supply chain contracts is English law or law based on English law Thus the author discusses potential contractual claims for damages arising from a loss of profits caused by a loss of reputation resulting from violations of core provisions of the chain leader s supplier code of conduct pursuant to English law As international supply chain disputes usually involve more than two parties and international arbitration is the ideal means for the resolution of these disputes the book compares the arbitration rules for consolidations and joinders of some of the most significant international arbitration institutions SIAC ICC AIAC ICDR VIAC CIETAC and HKIAC The book is directed at legal practitioners legislators of various jurisdictions board members of corporations ethics and compliance officers academics researchers and students It is the author s main goal that the book serves as an inspirational source for the establishment or the improvement of a corporate ethics and CSR system preventing window dressing and greenwashing and covering the entire supply chain Furthermore it is intended that students develop a deeper understanding for the enforcement of corporate ethics and CSR policies      **List of Serials Currently Received in the Library of the United States**

Hillebrand, 2012-10-03 Counter Terrorism Networks in the European Union Maintaining Democratic Legitimacy after 9 11 presents a model of democratic legitimacy for within international counter terrorism co operation Exploring the current practices of European Union EU counter terrorism policing developed after 9 11 it highlights the current significant challenges to democratic legitimacy and seeks to present tools and solutions which ensure democratic counter terrorism actions and the protection of human rights Counter terrorism policing is now a global concern with co operation between security authorities of different countries a crucial feature in the fight to prevent terrorism and extremism Yet given the emphasis on pre emption this type of policing tends to interfere to a far greater extent with the rights of the individual than traditional policing This book scrutinises the current focus of enhanced communication between counter terrorist associates at member state and EU levels within Europe alongside analysis of just how far the traditional protective mechanisms of accountability and oversight are managing to keep up with this development It proposes that current forms of counter terrorism policing within the EU should be understood as networks sets of expert institutional nodes or individual agents from at least two countries that are interconnected in order to authorize and provide security with regard to counter terrorism using the European Police Office Europol as a key example
