Cascade of Arms Andrew J. Pierre, 1997-11-01 With the post cold war emphasis on the proliferation of weapons of mass destruction the neglected dimension has been the spread of advanced conventional arms Yet these are the arms most likely to be used in conflict They present the greatest diversion from economic and social development and are the centerpiece of regional security balances This book examines the policies and practices of the major arms supplying nations looks at the impact of weapons purchases on the principal recipient regions and the possibilities for regional arms control and dissects the economics of arms exports for the producer nations in both the developing and industrialized worlds The book thoroughly discusses the opportunities for and obstacles to achieving multilateral restraint on arms In addition to the editor contributors are Ian Anthony Stockholm International Peace Research Institute Nicole Ball Overseas Development Council Julian Cooper University of Birmingham Lawrence Freedman and Martin Navias King's College London Rodney Jones Policy Architects International Ethan Kapstein University of Minnesota Michael Klare Five College Program in Peace and World Security Studies Andrew Mack Australian National University Abdel Monem Said Aly Center for Political and Strategic Studies Cairo Janne Nolan Brookings Institution Andrew Ross Naval War College Gerald Segal International Institute for Strategic Studies

and Gerald Steinberg Bar Ilan University Israel Copublished with the World Peace Foundation Regionalism in the New Asia-Pacific Order Joseph A. Camilleri, 2003-01-01 Regionalism in the Asia Pacific is a complex and rapidly evolving phenomenon This volume explores the relationship between globalization and regionalization between states markets and civil society and between US hegemony and Asian aspirations Multilateral Negotiations Fen Osler Hampson, Michael Hart, 1999-04-05 Political scientist Fen Osler Hampson with the assistance of trade specialist Michael Hart studies the component parts of the multilateral negotiation process to identify those factors making for success or failure The authors argue that multilateral negotiation is in essence a coalition building enterprise involving states nonstate actors and international organizations Among the questions they raise are How do issues get to the table in multilateral negotiations Who sits at the table and who composes the tiers of relevant stakeholders What are the procedures for managing complexity What are the obstacles strategic and psychological to reaching agreement Ranging from the 1963 Test Ban Treaty to the Climate Change Convention 1992 and the completion of the Uruguay Round of GATT 1993 individual case studies include discussions on security environmental and economic issues Of particular interest is the attention given to nongovernmental actors such as scientists and environmental groups like Greenpeace International in prenegotiation and negotiation phases

Explaining and Influencing Chinese Arms Transfers Karl W. Eikenberry, 1995 *To Agree or Not to Agree* Lisa Baglione, 2010-08-04 Why were the leaders of the United States and the Soviet Union able to negotiate a series of arms control agreements despite the deep and important differences in their interests during the Cold War Lisa A Baglione considers a variety of explanations for the successes and failures of these negotiations drawn from international relations theories Focusing on the goals and strategies of individual leaders and their ability to make these the goals and strategies of their nation the author develops a nuanced understanding that better explains the outcome of these negotiations Baglione then tests her explanation in a consideration of negotiations surrounding the banning of above ground nuclear tests the Strategic Arms Limitation Talks of the 1970s the negotiations for the limitation of intermediate range nuclear forces in the 1980s and the last negotiations between the Americans and the disintegrating Soviet Union in 1990 and 1991 How these great rivals were able to negotiate significant arms control agreements not only will shed light on international relations during an important period of history but will help us understand how such agreements might develop in the post Cold War period when arms proliferation has become a serious problem This book will appeal to scholars of international relations and arms control as well as those interested in bargaining and international negotiations and contemporary military history Lisa A Baglione is Assistant Professor of Political Science St Joseph s University Saving Our Planet Mostafa K. Tolba, 2012-12-06 Saving Our Planet analyses the changes both positive and negative that have occurred in the environment in the past two decades It focuses not only on the state of the environment but also on the interactions between development activities and the environment It highlights the main responses since 1972 to protect the environment It is based on a wide

ranging review of the scientific literature UNEP reports and other sources and over 500 references are listed Salvemos El Planeta Kostafa K. Tolba, 2012-12-06 **The Iraqi Invasion of Kuwait** Hamdi Hassan, 1999-09-20 To what extent has religion identity and otherness facilitated and accelerated armed conflict in the Middle East Ecology and Power Alf Hornborg, Brett Clark, Kenneth Hermele, 2013-06-19 Power and social inequality shape patterns of land use and resource management This book explores this relationship from different perspectives illuminating the complexity of interactions between human societies and nature Most of the contributors use the perspective of political ecology as a point of departure recognizing that human relations to the environment and human social relations are not separate phenomena but inextricably intertwined What makes this volume unique is that it sets this approach in a trans disciplinary global and historical framework *Cooperation in the Baltic Sea Region* Pertti Joenniemi, 1993 Generates new concepts of economic military and environmental security for the Baltic and discusses a future agenda for the region with ideas for policies which are needed but which in many cases do not exist *The Role and Control of Weapons in the 1990s* Frank Barnaby, 2021-05-30 This book first published in 1992 examines defence issues as the twentieth century drew to a close With the end of the Cold War many of the threats to European security such as the threat of nuclear war disappeared New ones however were emerging The rise of nationalism the spread of weapons of mass destruction to politically unstable countries the increase in world population the debt crisis all these contributed to security problems that needed to be resolved The book assesses the possibilities for future European defence and the role that the United States would play in it will it be prepared to stay in Europe under European leadership or must it dominate It also considers the capabilities offered by new military technology and the need for control of weapons of mass destruction State of the World, 1993 Lester Russell Brown, 1993 *The Limited Partnership* James E. Goodby, Benoit Morel, 1993 This book presents a detailed assessment of the conditions for security relations between Washington and Moscow in the post cold war era focusing on the scope for future co operative management of common security Three main areas provide the context for a thematically and theoretically varied discussion the security and foreign policy implications of the transition from the Soviet to a Russian Commonwealth regime military power and international stability after the cold war and the political military and technological requirements for a new security relationship Between Development and Destruction Kumar Rupesinghe, Paul Sciarone, Luc van de Goor, 2016-07-27 Much has already been written about the effects of the changes of the Cold War on conflict The ongoing disengagement of East and West from bipolar Cold War politics has resulted in an unstable international political situation which is characterized by regional conflicts Most analyses now concentrate on the consequences for Europe and the former communist Central and East European states This book however explores the effects for the Third World The contributors provide major theoretical analyses of the causes of conflict in developing countries Four main factors are distinguished the processes of state formation and nation building the rise or return of ethnicity and nationalism socio economic factors and

the armaments conflict nexus The volume also provides in depth regional analyses as well as policy perspectives on the issue of conflict and development Combating Weapons of Mass Destruction Nathan E. Busch, Daniel Joyner, 2009-01-01 The spread of weapons of mass destruction poses one of the greatest threats to international peace and security in modern times the specter of nuclear chemical and biological weapons looms over relations among many countries The September 11 tragedy and other terrorist attacks have been painful warnings about gaps in nonproliferation policies and regimes specifically with regard to nonstate actors In this volume experts in nonproliferation studies examine challenges faced by the international community and propose directions for national and international policy making and lawmaking The first group of essays outlines the primary threats posed by WMD proliferation and terrorism Essays in the second section analyze existing treaties and other normative regimes including the Nuclear Non Proliferation Treaty and the Chemical Weapons and Biological Weapons Conventions and recommend ways to address the challenges to their effectiveness Essays in part three examine the shift some states have made away from nonproliferation treaties and regimes toward more forceful and proactive policies of counterproliferation such as the Proliferation Security Initiative which coordinates efforts to search and seize suspect shipments of WMD related materials **McNair Papers** National Defense University, Central and Eastern Europe Regina Cowen Karp, 1993 V The return of history **The Politics of Ballistic Missile Nonproliferation** W. Bowen, 2000-01-20 During the presidency of George Bush 1989 93 the proliferation of nuclear chemical and biological weapons and the ballistic missiles capable of delivering them rose greatly in significance as issues on the American security agenda In the missile field this became evident by the efforts of certain elements in the executive branch and several congressmen to improve domestic and international implementation of the Missile Technology Control Regime The Politics of Ballistic Missile Nonproliferation examines the political bureaucratic and systemic issues that interacted to determine the outcome of these efforts
