Teachers And Educators:

And Sadly Teach Jurgen Herbst, 1989 To lend weight to his charge that the public school teacher has been betrayed and gravity to his indictment of the educational establishment for that betrayal Jurgen Herbst goes back to the beginnings of teacher education in America in the 1830s and traces its evolution up to the 1920s by which time the essential damage had been done Initially attempts were made to upgrade public school teaching to a genuine profession but that ideal was gradually abandoned In its stead with the advent of newly emerging graduate schools of education in the early decades of the twentieth century came the so called professionalization of public education At the expense of the training of elementary school teachers mostly women teacher educators shifted their attention to the turning out of educational specialists mostly men administrators faculty members at normal schools and teachers colleges adult education teachers and educational researchers Ultimately a history of the neglect of the American public school teacher And Sadly Teach ends with a plea and a message that ring loud and clear The plea that the current reform proposals for American teacher education the Carnegie and the Holmes reports be heeded The message that the key to successful school reform lies in educating teacher s true professionals and in acknowledging them as such in their classrooms *Bulletin - Association of Teacher Educators* Association of Teacher Educators, 1958 *Narratives from the Classroom* Paul Chamness Miller, 2004-11-08 The stories kept me wanting more and the lessons are valuable information for pre service teachers Bravo Sharon Ulanoff California State University Los Angeles *Narratives from the Classroom* will be useful in its ability to stimulate students to get in touch with their past experiences in education in a critical way The questions offer a natural beginning for sharing experiences In this way beliefs and values can be recognized scrutinized and defended James Curtiss Wayne State College These narratives provide expansive opportunities for reflection and encourage each student to come to their own understanding about what it means to be a teacher Betty C Eng Hong Kong Institute of Education In order for pre service teachers to fully understand what it means to choose teaching as a career it is important for them to connect with experienced teachers who can share their experiences of what occurs within the walls of schools Narrative accounts of teachers experiences with students parents administrators and colleagues are an excellent way for pre service teachers to obtain a clearer picture of what teaching really involves *Narratives from the Classroom* An Introduction to Teaching introduces the reader to many of the important classroom issues surrounding the field of teaching This book is unique in that it is a collection of personal accounts and ideas written by the teachers and teacher educators who lived those experiences Because this is an introduction to teaching each chapter addresses a different topic ranging from the purpose of schools and teachers issues about policies and programs in the school and various practices found within the classroom walls There is also a section that addresses preparation for the job market and what the first year of teaching is like This book deliberately avoids being prescriptive and encourages the reader to form his or her own conclusions about the presented issues *Narratives from the Classroom* is

designed as a supplemental text for teacher education courses especially those at the introductory stages Beginning teachers and anyone considering teaching as a career will also find this collection an important and insightful addition to their libraries Key Features Editor s introduction to each narrative provides context Questions and further readings stimulate the reader s engagement and commitment to the topic Narratives provide readers with significant exposure to 16 experienced teachers and teacher educators Coverage includes diverse experiences and opinions from authors of various ethnic backgrounds

Becoming a Teacher Educator Anja Swennen, Marcel van der Klink, 2010-12-15 Becoming a Teacher Educator is an impressive book for teacher educators who want to be informed about the latest views and practices of their profession It is the first book that addresses a range of topics related to the work of teacher educators the induction of teacher educators and their further professional development Becoming a Teacher Educator has a practical focus and it provides theoretical insights experiences of experts and practical recommendations The book is rooted in the Association of Teacher Education in Europe ATEE and many of the chapters are written by authors who are active members of the ATEE Researchers and practitioners from different parts of Europe and beyond joined their efforts to write a book that is truly international and combines research practice and reflection Becoming a Teacher Educator is essential reading for novice teacher educators as well as for experienced teacher educators who want to keep up with the latest insights in their profession This book provides a guide for those who supervise novice and experienced teacher educators and for various professionals who are responsible for the professional development of teacher educators There is a growing need for evidence based resources made available to future teacher educators Since a learning society requires new sets of competencies of the main actors we are most in want of knowledgeable teacher educators that support the professional development of their student teachers This book fits the actual demands Dr Joost Lowyck Professor Emeritus former director of the Teacher Education Institute Leuven University This is an original book in a very important area The editors define the concept of teacher educator widely and I think therefore that the book is relevant for schools higher education and education authorities of all kinds The authorship and theme have wide relevance across Europe Australasia and North America Prof Bob Moon Professor in Education Teaching Studies Department of Education Open University UK The book highlights that while the current global focus is very much on the need to educate sufficient and highly qualified teachers little political focus is given to those who teach the teachers What makes this book distinctive for all engaged in teacher education whether experienced or novice is that it allows the spotlight on those who teach the teachers and the opportunity for teacher educators to discuss debate and seriously examine themselves as a profession Simone White Deakin

University Australia **Teacher Educators in the Twenty-first Century** Gerry Czerniawski, 2018 This book links theory policy and practice in a critical examination of the relationship between the professional identity knowledge learning needs and research experience of teacher educators The book concludes by drawing these themes together as a means to support the induction and further professional development of teacher educators Teacher educators have until relatively recently been invisible in the eyes of policy makers with little attention given to their induction and professional learning needs This book draws on a growing body of research on this diverse profession within a context where in many countries the school practicum plays an increasing role in the training and education of teachers The recent policy gaze of the European Commission has added further momentum to the attention being given to teacher education its educators and the role they play in pupil achievement However for many beginning teacher educators little support is offered at the start of their new career trajectories in schools colleges or universities This book examines some of the issues surrounding these career transitions and the implications they have for professional learning It serves as an invaluable yet accessible source of knowledge for all those interested in the professional learning needs and recognition of this heterogeneous occupation
