Teaching Beginning Reading and Writing with the Picture Word Inductive Model Emily Calhoun, 1999 In this practical guide to teaching beginning language learners of all ages Calhoun encourages us to begin where the learners begin with their developed listening and speaking vocabularies and other accumulated knowledge about the world Engage students in shaking words out of a picture words from their speaking vocabularies to begin the process of building their reading and

writing skills Use the picture word inductive model PWIM to teach several skills simultaneously beginning with the mechanics of forming letters to hearing and identifying the phonetic components of language to classifying words and sentences through forming paragraphs and stories based on observation Built into the PWIM is the structure required to assess the needs and understandings of your students immediately adjust the lesson in response and to use explicit instruction and inductive activities Individual small group and large group activities are inherent to the model and flow naturally as the teacher arranges instruction according to the 10 steps of the PWIM Students and teachers move through the model and work on developing skills and abilities in reading writing listening and comprehension as tools for thinking learning and sharing ideas Transforming Teacher Education Through the Epistemic Core of Chemistry Sibel

Erduran,Ebru Kaya,2019-06-10 This book synthesizes theoretical perspectives empirical evidence and practical strategies for improving teacher education in chemistry Many chemistry lessons involve mindless cookbook activities where students and teachers follow recipes memorise formulae and recall facts without understanding how and why knowledge in chemistry works Capitalising on traditionally disparate areas of research the book investigates how to make chemistry education more meaningful for both students and teachers It provides an example of how theory and practice in chemistry education can be bridged It reflects on the nature of knowledge in chemistry by referring to theoretical perspectives from philosophy of chemistry It draws on empirical evidence from research on teacher education and illustrates concrete strategies and resources that can be used by teacher educators The book describes the design and implementation of an innovative teacher education project to show the impact of an intervention on pre service teachers The book shows how by making use of visual representations and analogies the project makes some fairly abstract and complex ideas accessible to pre service teachers
