Teachers' Professional Lives Ivor F. Goodson, 2002-11-01 This text provides a discussion of the meaning of teacher professionalism and how it can be improved *Teachers' Professional Lives--a View from Nine Industrialized Countries*

Carol F. Stoel, Tin-Swe Thant, 2002 **Teachers' Professional Lives** Ivor F. Goodson, 2002-11 First published in 2004 Routledge is an imprint of Taylor Francis an informa company **Research on Teachers' Professional Lives**, 1989

Professional Knowledge, Professional Lives Ivor Goodson, 2003-09-16 Professional Knowledge Professional Lives sets out to examine the state of professional knowledge with regard to teaching and teacher education The current situation of professional knowledge is scrutinised with particular regard to the location of educational study within the faculties of education The fate of disciplinary patterns of study which have come under attack from the proponents of more practical perspectives are also examined Practical perspectives promoted by a wide spectrum of advocates have become part of the fashionable discourse around teacher education recently These perspectives are interrogated and some of the results of such practical fundamentalism are held up for scrutiny The author argues that confining professional knowledge entirely within the practical domain would not seem to be a well thought out strategy for raising professional standards A more active notion of teachers professional knowledge can and should be explored and consolidated by work which focuses on the teacher s life and work using more reflective and public intellectual modes *Professional Knowledge, Professional Lives* Ivor

Goodson, 2003 Ivor Goodson gives an examination of the state of professional knowledge in teaching and teacher education It argues that a more active notion of teachers professional knowledge can and should be explored and consolidated by work which focuses on the teacher s life and work using more reflective modes *Teacher Professional Development in Changing Conditions* Douwe Beijaard, Pauline C. Meijer, Greta Morine-Dershimer, Tillema Harm, 2005-12-12 This book presents some highlights from the deliberations of the 2003 conference of the International Study Association on Teachers and Teaching ISATT Part 1 presents the five keynote addresses of the conference while Parts 2 through 4 present selected papers related to each of three sub themes knowledge construction and learning to teach perspectives on teachers personal and professional lives and teachers workplace as context for learning The chapters in this book provide an array of approaches to understanding the process of teacher learning within the current context of the changing workplace environment They also provide an important international perspective on the complex issues revolving around the international educational reform movement Basically they show how teachers workplace inside and outside schools are more than ever subject to continuous change and that subsequently standards for teaching must be flexible to these changing conditions This asks for a redefinition of teacher professionalism in which the role of context in teacher learning is emphasized as well as the improvement of the quality of teacher thinking and learning Related to the ever changing context of teaching a dynamic approach to teaching and teacher learning is required in which identity development is crucial Researchers have an

important role to play in revealing and explaining how teachers can build their professional identity through self awareness and reflection in the ever changing educational contexts throughout the world **The Role of Unions in Teachers'**

Professional Lives Nina Bascia,1992 *Novice Mathematics Teachers' Professional Learning* Xiaoli Lu,2022-05-04 This book investigates three novice high school mathematics teachers professional learning processes in the early stages of their careers at schools in Shanghai China Teacher professional learning is examined as a complex and dynamic system that connects both cognitive and situated perspectives on learning theory Inspiring mathematics teachers to adopt student focused pedagogies is challenging particularly in China where tensions in teacher centred content focused and examination oriented practices are predominant The three novice teachers who participated in this study brought different beliefs and knowledge derived from their different individual experiences to bear on their teaching practices However they were strongly influenced by the environments in which they taught and mainly adopted a professional learning approach to teacher centred practices despite reporting that they favoured student centred teaching practices The study also observed professional learning towards student centred pedagogical aspects in a single teacher case with mentorship support indicating that student centred pedagogies may be promoted within the constraints of the existing dominant teaching practice **New Teacher Education for the Future** Yin Cheong Cheng,King Wai Chow,Kwok Tung Tsui,2001-06-30
