Teachers Wanted:

Teachers Wanted Daniel A. Heller, 2004-07-15 The public school system in the United States faces a perpetual challenge in attracting and retaining well qualified teachers In Teachers Wanted Attracting and Retaining Good Teachers Daniel A Heller provides an insider s view of the sources of this ongoing problem and powerful suggestions for resolving it Drawing on national research as well as his own 30 years of experience as a teacher a principal and an administrator Heller argues for a new concept of public education beginning with the nature of teacher training He advocates partnerships between public schools and higher education to provide a real world view of the profession to young teacher interns Within the schools Heller espouses active gatekeeping by teachers and administrators effective mentoring between teachers community induction programs ongoing inservice training and high performance standards At the heart of many of these changes stands the principal From upholding the mission of the school to interviewing and hiring teachers to empowering staff to make decisions affecting their own work to creating an atmosphere in the school that fosters professional development the principal plays a key role in breathing new life into the teaching profession We can revitalize teaching if we are willing to embrace new roles and responsibilities across the educational community Teachers Wanted offers practical insights into the changes that are essential to building a dynamic intellectually challenging school environment that will attract and keep the most highly qualified teachers Note This product listing is for the Adobe Acrobat PDF version of the book **The Nebraska Teacher** ,1919 Developing Teachers Chris Day, 2002-01-04 Effective schools or improving schools are fashionable terms in the rhetoric of recent education movements yet the heart of these movements is often more to do with teaching quality than with school practice This book takes a holistic view of teacher development examining the contexts and conditions of teaching school leadership and culture teachers lives and histories change teacher learning competence and expertise and the moral purposes of teaching Day looks at the conditions under which teacher development may be enhanced and brings together research and other information from the UK and overseas Normal Instructor and Teachers World ,1918

Keepers of the American Dream Christine E. Sleeter, 2012 This book reports an ethnographic study of thirty teachers from eighteen schools who participated in a staff development programme in multicultural education The study examines how multicultural education was actually presented to teachers and areas in which their classroom teaching and perception of students changed over the two year period Although most of the teachers reported learning a good deal changes in their teaching and their discussions of teaching were fairly limited After reporting the data the book examines why changes were limited analyzing three areas the nature of staff development and how multicultural education was packaged the structure of schools as institutions and the identities and life experiences of teachers as White women often from working class backgrounds Jsl Vol 5-N5 JOURNAL OF SCHOOL LEADERSHIP, 1995-09-01 The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts We welcome manuscripts

based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations The editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world Growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement *The Business Educator* ,1922 *Teacher Leader Stories* Judy Swanson, Kimberly Elliott, Jeanne Harmon, 2011-06-28 This practical guide provides compelling case studies explicit guidance on using case writing and case analysis and a facilitator s guide to enrich teachers professional learning *The Congregationalist and Advance* ,1918 **Do Teachers Wish to Be Agents of Change?** Allen Menlo, LeVerne Collet, 2015-04-27 This study surveyed principals and teachers in ten countries to compare principal and teacher attitudes toward the involvement of teachers in several change and development responsibilities The participating countries were Australia Canada China Hungary Israel Japan Netherlands Singapore South Africa and United States Each country administered mirror versions of a questionnaire to samples of at least 50 principals and at least 100 teachers The questionnaires listed twenty items describing change responsibilities in which teachers might become involved For each item both principals and teachers assigned two teacher involvement ratings their personal preference and their estimate of the preference of their role counterpart These involvement ratings produced four dependent variables Principal Preferences Principal Estimates Teacher Preferences and Teacher Estimates For each variable item responses were clustered to form index sub scores that measured attitudes toward five education domains Administration and Coordination Human Relations Teacher Support Classroom Learning and Evaluation Systematic planned comparisons were conducted to determine the most important principal teacher issues within and between countries and how issues change across index domains Typical results indicate low awareness of each other s aspirations and expectations The first and last chapters of this book discuss the potential of teacher leaders to become agents of change within their own schools Several social psychological competencies are then described for these teachers in their work *Perspectives on Supported Collaborative Teacher Inquiry* David Slavit, Tamara Holmlund Nelson, Anne Kennedy, 2009-06-11 This volume describes supported collaborative inquiry as a framework for teacher professional development The chapters focus on the building of collaborative support structures nurturing an inquiry stance progressing through an inquiry process as well as the various kinds of support mechanisms necessary to engage in SCTI **Illustrated Phonographic World** ,1912 **What African American Parents Want Educators to Know** Gail L. Thompson, 2003-05-30 Thompson designed an empirical study to gather feedback from African American parents on numerous issues pertaining to their children s schooling experiences The results discussed in this book can be utilized to improve the schooling experiences of African American children nationwide The African American parents guardians who participated in this study were biological parents in two parent homes single

parents grandparents foster parents and stepparents who were rearing school age children Some had been deterred from completing their own formal education as a result of peer pressure temptation outside of school or stressful circumstances Others had positive schooling experiences and stable childhoods Regardless of the differences in their background experiences the majority of these parents or guardians were single minded about wanting a better life for their children believing that a good K 12 education and college education were crucial to their children s advancement And while most believed resolutely in the hope offered by the public school system they recognized that schools couldn t do it all African American parents and guardians are willing to work with teachers and administrators to ensure that their children receive a quality education Yet if the historic achievement gap is ever to be eradicated teachers administrators researchers and policymakers must be more willing to view African American parents guardians as assets African American parents guardians must be invited to verbalize their concerns and those concerns must be taken seriously to effect meaningful and lasting change in the public school system Common School Education and Teachers World ,1894 **Teachers' Personal**

Epistemologies Gregory Schraw,Jo Lunn Brownlee,Lori Olafson,Michelle Vander Veldt Brye,2017-07-01 The focus of this book is to explore teachers evolving personal epistemologies or the beliefs we hold about the origin and development of knowledge in the context of teaching The chapters focus on a range of conceptual frameworks about how university and field based experiences influence the connections between teachers personal epistemologies and teaching practice In an earlier volume we investigated preservice and inservice teachers beliefs and teaching practices Brownlee Schraw and Berthelsen 2011 While we addressed the nature of teachers personal epistemologies learning and teaching practices and approaches for changing beliefs throughout teacher education programs the volume did not address conceptual frameworks for the development of teacher s personal epistemologies To address this gap the book is focused on teacher educators teachers and teacher education programmers in universities with an overall aim of highlighting how we might support preservice teachers involvement in learning that is challenging and inservice teachers engagement in professional experiences that promote changes in teaching practice We argue that teachers need to be encouraged to question their beliefs and develop increasingly sophisticated beliefs about their knowledge and their students knowledge that facilitate learning and intellectual growth Psychological Research in the Classroom Teresa M.
