Space Resource Utilization and Exploitation: The Suspended Step of International Law George D. Kyriakopoulos, 2025-10-25 The exploration use and exploitation of space resources is the most exciting chapter among today's issues of concern to the space community At the same time however it has generated intense controversy at the international level since current international and space law do not seem to ensure a stable clear regime for such activities to take place Furthermore some legislative approaches at the national level which have seen the light of day do not seem capable of ensuring a universally acceptable solution It could therefore be said that the question of how the governance of space resources in general should ideally be regulated remains for the time being unresolved This book thoroughly reviews the relevant international experience and explores why current international law is at an impasse on the issue of space resources Further it discusses the possible ways out in the legal field and proposes solutions some of which have not been presently discussed
