The Of World Cuisines:

Three World Cuisines Ken Albala, 2012-05-03 The text begins with a comprehensive theory of cuisine in the introduction and moves to the parallel culinary histories of Italy Mexico and China the independent domestication of crops in each the social political and technological developments that gave rise to each cuisine and cooking in both professional and home settings It also compares the internal logic of the cooking style and techniques in a way that will resonate with students The meat of the text compares and contrasts the three cuisines in chapters on grains and starches vegetables fruits and nuts meat poultry and dairy products fish and shellfish fats and flavorings and beverages Readers are taken on a fascinating journey of discovery where the background story of mis transmission adaptation and evolution of cooking as it spreads around the globe with trade and immigration is revealed It answers the big questions such as why did the wok prevail in China while the saut e pan and comal were used in Italy and Mexico respectively Why is bread baked in the Mediterranean but more often steamed in the Far East How are certain ingredients used in completely different ways by different cultures and why Why is corn transformed into tortillas and tamales in one place and into polenta in another Why do we find tomato salsa in the Americas long cooked sauces in Italy and tomatoes mixed with scrambled eggs in China Albala also challenges the notion of authenticity providing ample evidence that cuisines are constantly evolving adapting over time according to ingredients and cooking technologies More than 150 of Albala s recipes complete the instruction inspiring readers to learn how to cook in a fundamental way The UN World Food Programme and the Development of Food Aid D. Shaw, 2001-05-17 This is the first history to be written of the World Food Programme WFP the food aid arm of the United Nations System It tells the story of the antecedents and origins of WFP and growth from modest beginnings as a three year experiment in 1963 65 to become the main source of international food aid for both disaster relief and development against the background of the evolution and development of food aid This dual role has put WFP in the front line of the United Nations attack on poverty hunger and food insecurity The World Food Outlook Donald O. Mitchell, Merlinda D. Ingco, Ronald C. Duncan, 1997-03-06 Modern day Malthusians warn that Malthus will ultimately be right the world will be less and less able to feed itself as populations keep expanding and crop yields seem to have reached a peak The authors of this volume believe that this pessimism is misplaced and that there is in fact no worldwide food crisis On the contrary they show that the world food situation has improved dramatically over the past three decades prices of agricultural commodities are at their lowest level in history in real terms and crop output is continuing to rise faster than population This book provides a much needed and reasoned view on a subject that is too often treated emotionally The important changes in the international food economy are considered in historical context and provide a basis for projections to 2010 The situation should continue to improve and food should become cheaper than it is today *The World Food Situation* United States. Congress. House. Committee on Foreign Affairs, 1983 **The World Food Situation and Prospects to 1985** United States. Department of Agriculture.
