The Nag Hammadi Library in English James McConkey Robinson,1984 **The Origin of the World According to Revelation and Science (Classic Reprint)** John William Dawson,2015-06-30 Excerpt from The Origin of the World According to Revelation and Science The scope of this work is in the main identical with that of Archaia published in i 860 but in attempting to prepare a new edition brought up to the present condition of the subject it was found that so much required to be rewritten as to make it essentially a new book and it was therefore decided to give it a new name more clearly indicating its character and purpose The intention of this new publication is to throw as much light as possible on the present condition of the much agitated questions respecting the origin of the world and its inhabitants To students of the Bible it will afford the means of determining the precise import of the biblical references to creation and of their relation to what is known from other sources To geologists and biologists it is intended to give some intelligible explanation of the connection of the doctrines of revealed religion with the results of their respective sciences A still higher end to which the author would gladly contribute is that of aiding thoughtful men perplexed with the apparent antagonisms of science and religion and of indicating how they may best harmonize our great and growing knowledge of nature with our old and cherished beliefs as to the origin and destiny of man About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
