

# **TRAFFIC IMPACT ASSESSMENT FOR PREPARERS**

Traffic Impact Assessment (TIA) is an essential tool in determining the possible impacts of development projects, such as commercial establishments, educational facilities and housing, on the transportation system. The main goal of TIA preparation is to identify traffic control as well as transport facility improvements, including roadway and intersection geometry requirements, that are needed to accommodate the additional traffic generated by the proposed development. This training will provide a comprehensive understanding of the overall purpose, scope, processes, and analytical tools needed to prepare a TIA report.

This text explains what constitutes good practice in applying environmental assessment as an environmental management tool. A wide range of case studies and other student text features are employed to demonstrate how the different methods, techniques and disciplines of environmental assessment can be used. The authors address the key concepts for environmental assessment procedures, methods for using EIA techniques for impact prediction and evaluation, environmental risk assessment, EA consultation and participation, project management, environmental statement review and post project analysis and strategic environmental assessment. Worldwide case studies include gas pipelines, hydroelectric power plants, gold mining, river crossings, waste to energy plants and gravel extraction in England, Scotland, Ireland, Canada, the USA, Venezuela, the Netherlands, Iceland, Zambia, Zimbabwe, South Africa and Ghana. *Site Impact Traffic Assessment: Problems and Solutions.
