Crime, Drugs and Social Theory Chris Allen, 2017-03-02 Do criminal cultures generate drug use Crime Drugs and Social Theory critiques conventional academic and policy thinking concerning the relationship between urban deprivation crime and drug use Chris Allen outlines an innovative constructionist phenomenological perspective to explore these relationships in a new light He discusses how people living in deprived urban areas develop natural attitudes towards activities such as crime and drug use that are prevalent in the social worlds they inhabit and shows that this produces forms of articulation such as I don't know why I take drugs I just take them and drugs come naturally to me He then draws on his constructionist phenomenology to help understand the natural attitude towards crime and drugs that emerge from conditions of urban deprivation as well as the non-reasoned forms of articulation that emerge from this attitude The book argues that understanding the conditions in which drug users deviate from their natural attitude can help effective intervention in the lives of drug users

Soja details the trajectory of this turn and lays out its key debates. An expanded critique of historicism and a refined grasp of materialist dialectics bolster Soja's attempt to introduce geography to postmodernity, animating a series of engagements with Heidegger, Giddens, Castells and others. Two exploratory essays on the postfordist landscapes of Los Angeles complete the book, offering a glimpse of Soja's new geography carried into its highest register.

Politics, Social Theory, Utopia and the World-System C. el-Ojeili, 2012-01-25 It is common to hear that we live in unique, turbulent and crisis-ridden times, and this turbulence, transformation and crisis are said to be deeply significant, perhaps threatening for the human sciences. Responding to such claims, this book provides an accessible engagement with pressing contemporary topics such as violence, social movements, equality, identity and democracy. Foregrounding the imagination of possibilities, utopia, the mapping of the present, theory and the transformation of the world system, historical and global questions, the book surveys central issues and paradigms in contemporary political sociology, urging a recommitment to certain concepts and traditions for guidance in thinking and acting in the world. **Community Development for Times of Crisis** Mark A. Brennan, Rhonda Phillips, Norman Walzer, Brent D. Hales, 2022-12-30 This book explores the intersection of community development and local capacity building as a basis for effective disaster mitigation and the alleviation of suffering in times of crisis. Beginning with the Community Development section, the process, context and methods for community engagement and development can be viewed from different structural and logical approaches. This section explores some of the more relevant historical arguments as well as more contemporary examinations. The second section looks at Critical Human and Community Considerations and sheds light on some of the key concepts that are often overlooked: poverty, race, inequality, social justice, mental health, social division when framing community responses to disaster. The third section focuses on Fundamental Elements of Caring Communities. This section explores the importance, practical and measurable impacts of social support, empathy, inclusion and conflict resolution in creating effective and caring community responses. Finally, the last section focuses on practice and brings together research and theory into applied programming examples and evidence from on the ground efforts to establish caring communities that respond to local needs in times of crisis and beyond.

By addressing these objectives this book provides a more complete understanding of the essential role that community can play in disaster mitigation. Doing this will provide a better focus for ongoing research endeavors and program and policy initiatives at the community level that seek to prepare for, respond to, and recover from natural and other disasters. As a result, this book contributes to wider and more sustainable development of our communities beyond disasters while furthering dialog among community scholars and practitioners.
