Literature, Science, Psychoanalysis, 1830-1970 Helen Small, Trudi Tate, 2003 The interactions

between literature and science and between literature and psychoanalysis have been among the most thriving areas for interdisciplinary study in recent years. Work in these open fields has taught us to recognize the interdependence of different cultures of knowledge and experience, revealing the multiple ways in which science, literature, and psychoanalysis have been mutually enabling and defining as well as corrective and contestatory of each other. Inspired by Gillian Beer's path-breaking work on literature and science, this volume presents fourteen new essays by leading American and British writers. They focus on the evolutionary sciences in the nineteenth century, the early years of psychoanalysis from Freud to Ella Freeman Sharpe, and the modern development of the physical sciences. Drawing on recent debates within the history of science, psychoanalytic literary criticism, intellectual history, and gender studies, the volume makes a major contribution to our understanding of the formation of knowledge. Among its recurrent themes are curiosity and epistemology, growth, maturity, and coming of age, as structuring metaphors. Several essays focus especially on childhood, taxonomy, sleep, and dreaming, and elusive knowledge, the physiology of truth, and the gender politics of scientific theory and practice. The essays also reflect Beer's extensive influence as a literary critic, with close readings of works by Charlotte Brontë, Alfred Lord Tennyson, George Eliot, Thomas Hardy, Henry James, Oscar Wilde, H. G. Wells, Edith Ayrton, Zangwill, Charlotte Haldane, Virginia Woolf, George Orwell, and Karin Boye. *The Prayer That Changes Everything?* Stormie Omartian, 2005-07-01 **Deliver Me from Pain** Jacqueline H. Wolf, 2012-04-01

Despite today's historically low maternal and infant mortality rates in the United States, labor continues to evoke fear among American women. Rather than embrace the natural childbirth methods promoted in the 1970s, most women welcome epidural anesthesia and even Cesarean deliveries. In *Deliver Me from Pain*, Jacqueline H. Wolf asks how a treatment such as obstetric anesthesia, even when it historically posed serious risk to mothers and newborns, paradoxically came to assuage women's anxiety about birth. Each chapter begins with the story of a birth, dramatically illustrating the unique practices of the era being examined. *Deliver Me from Pain* covers the development and use of anesthesia from ether and chloroform in the mid-nineteenth century to amniotics, barbiturates, narcotics, opioids, tranquilizers, saddle blocks, spinals, and gas during the mid-twentieth century to epidural anesthesia today. Labor pain is not merely a physiological response but a phenomenon that mothers and physicians perceive through a historical, social, and cultural lens. Wolf examines these influences and argues that medical and lay views of labor pain and the concomitant acceptance of obstetric anesthesia have had a ripple effect, creating the conditions for acceptance of other, often unnecessary and sometimes risky, obstetric treatments: forceps, the chemical induction and augmentation of labor, episiotomy, electronic fetal monitoring, and Cesarean section. As American women make decisions about anesthesia today, *Deliver Me from Pain* offers them insight into how women made this choice in the past and why each generation of mothers has made dramatically different decisions. *Blood so Beautiful* Shauna Hockett, 2020-09-17
