The Abbot and the

Rule Michelle Still, 2017-03-02 St Albans was one of the greatest Benedictine abbeys of medieval England and the early 14th century was a period during which the concerns of the community and the role of the abbot emerge particularly clearly Yet the history of the abbey during this period has received little attention since general surveys undertaken over eighty years ago and the manorial history by Levett in 1938 Basing herself on the unique and relatively unexploited *Gesta Abbatum Monasterii Sancti Albani* Michelle Still examines the position of St Albans in both the secular and monastic worlds with a focus on the period 1290-1349 The study includes discussion of the role of the abbot as a feudal landlord a provider of education at the abbey's grammar school and a dispenser of charity In conclusion she notes the pivotal importance of the personality and influence of the abbot of St Albans in ensuring the strict observance of the Rule of St Benedict in an age when traditional monasticism was increasingly challenged Through the detailed study of this one abbey this book makes an important contribution to the overall picture of monastic life in medieval England

Archaic Style in English Literature, 1590-1674 Lucy Munro, 2013-11-28 Munro explores the conscious use of archaic language by poets and dramatists including Shakespeare Spenser Jonson and Milton

A Marginal Economy? Mark Bailey, 1989-06-29 A theory of the margin has long featured in the work of medieval historians Marginal regions are taken to be those of poor soil or geographical remoteness where farmers experienced particular difficulties in grain production It is argued that such regions were cultivated only when demographic pressure intensified in the thirteenth century but that a combination of soil exhaustion and demographic decline resulted in severe economic contraction by the end of the fourteenth century Marginal regions are seen not just as sensitive barometers of economic change but as important catalysts in that change Despite the importance placed by historians on the general theory of the margin this book represents the first detailed study of a marginal region It focuses upon East Anglian Breckland whose blowing sands are among the most barren soils in lowland England Drawing upon a wide range of sources this study reconstructs Breckland's late medieval economy and shows it to be more diversified and resilient than the stereotype depicted in marginal theory

Marketing English Books, 1476-1550 Alexandra da Costa, 2020-11-04 The monograph series Oxford Studies in Medieval Literature and Culture showcases the plurilingual and multicultural quality of medieval literature and actively seeks to promote research that not only focuses on the array of subjects medievalists now pursue in literature theology and philosophy in social political jurisprudential and intellectual history the history of art and the history of science but also that combines these subjects productively It offers innovative studies on topics that may include but are not limited to manuscript and book history languages and literatures of the global Middle Ages race and the

post colonial the digital humanities media and performance music medicine the history of affect and the emotions the literature and practices of devotion the theory and history of gender and sexuality ecocriticism and the environment theories of aesthetics medievalism Marketing English Books is about how the earliest printers moulded demand and created new markets Until the advent of print the sale of books had been primarily a bespoke trade but printers faced a new sales challenge how to sell hundreds of identical books to individuals who had many other demands on their purses This book contends that this forced printers to think carefully about marketing and potential demand for even if they sold through a middleman as most did that wholesaler bookseller or chapman needed to be convinced the books would attract customers Marketing English Books sets out therefore to show how markets for a wide range of texts were cultivated by English printers between 1476 and 1550 within a wider European context devotional tracts forbidden evangelical books romances gestic and bawdy tales news pilgrimage guides souvenirs and advertisements and household advice Through close analysis of paratexts including title pages prefaces tables of contents envoys colophons and images the book reveals the cultural impact of printers in this often overlooked period It argues that while print and manuscript continued alongside each other developments in the marketing of printed texts began to change what readers read and the place of reading in their lives on a larger scale and at a faster pace than had occurred before shaping their expectations tastes and even their practices and beliefs

Monastic Archaeology Graham Keevill, Mick Aston, Teresa Hall, 2017-01-31 The study of monasteries has come a long way since late the late 19th century The emphasis has shifted away from reconstructing the layouts of monastic buildings to a better understanding of the wider monastic environment The papers in this volume partly based on a conference held in Oxford in 1994 are written by some of today's foremost scholars and reflect the diversity of research now being carried out
