Taxpayers Of Medieval Gloucester:

The Taxpayers of Medieval Gloucestershire Peter Franklin, 1993 The bulk of the work consists of the full list of 9 000 names of Gloucestershire taxpayers from the year 1327 together with indices of their names and of the parishes where they lived

Commonwealth and the English Reformation Ben Lowe, 2017-03-02 Whilst much recent research has dealt with the popular response to the religious change ushered in during the mid Tudor period this book focuses not just on the response to broad liturgical and doctrinal change but also looks at how theological and reform messages could be utilized among local leaders and civic elites It is this cohort that has often been neglected in previous efforts to ascertain the often elusive position of the common woman or man Using the Vale of Gloucester as a case study the book refocuses attention onto the concept of commonwealth and links it to a gradual but long standing dissatisfaction with local religious houses It shows how monasteries endowed initially out of the charitable impulses of elites increasingly came to depend on lay stewards to remain viable During the economic downturn of the mid Tudor period when urban and landed elites refocused their attention on restoring the commonwealth which they believed had broken down they increasingly viewed the charity offered by religious houses as insufficient to meet the local needs In such a climate the Protestant social gospel seemed to provide a valid alternative to which many people gravitated Holding to scrutiny the revisionist revolution of the past twenty years the book reopens debate and challenges conventional thinking about the ways the traditional church lost influence in the late middle ages positing the idea that the problems with the religious houses were not just the creation of the reformers but had rather a long history In so doing it offers a more complete picture of reform that goes beyond head counting by looking at the political relationships and how they were affected by religious ideas to bring about change

The Self-contained Village? Christopher Dyer, 2007 These essays show how historical revisionism has overturned the view that English villages before industrialization had self sufficient economies and populations largely separated from the outside world Topics include demography migration agriculture inheritance politics employment industry and markets and covers such communities as Norfolk and Westmorland

The Fifteenth-century Inquisitions Post Mortem Michael Hicks, 2012 Essays offering a guide to a vital source for our knowledge of medieval England The Inquisitions Post Mortem IPMs at the National Archives have been described as the single most important source for the study of landed society in later medieval England Inquisitions were local enquiries into the lands held by people of some status in order to discover whatever income and rights were due to the crown on their death and provide details both of the lands themselves and whoever held them This book explores in detail for the first time the potential of IPMs as sources for economic social and political history over the long fifteenth century the period covered by this Companion It looks at how they were made how they were used and their accuracy and develops our understanding of a source that is too often taken for granted it answers questions such as what they sought to do how they were compiled and how reliable they are while also exploring how they can best be used for

Naming the People of England, c.1100-1350 Dave Postles, 2020-05-15 Medieval historians have for some time recognized the significance of personal naming processes and patterns for the

illumination of social relations such as kinship and spiritual kinship or godparenthood Increasingly they are employing the investigation of personal naming anthroponymy as part of their elucidation of cultural change attempting through changes in patterns of personal naming to discern cultural transitions and transformations Recent coordinated research on the European continent has produced major collaborative discussion of the cultural implications of naming in France the Iberian peninsula and Italy The fruits of new research into the Germanic lands have also richly enhanced our understanding of cultural change there So it is predicated that a new trans European culture arose in the centuries about and after the year 1000 Omitted from this coordinated understanding of the arrival of a new European cultural tradition as it came to persist is the British archipelago We are however far from devoid of scholarly examination of the culture of personal naming in the British Isles An older generation of linguists produced a basic foundation although it has not remained free of some criticism Subsequently several scholars have independently advanced the interpretive analysis Clark Fellows Jensen Insley and McClure At one level then this book attempts a synthesis of that previous highly valuable but diffuse research to make it more widely known understood and accessible At another level nonetheless it engages with what has become a prevailing narrative of cultural change in England after the Norman Conquest the rapid transformation of English naming and culture through the assimilation of a new dominant extraneous influence By reinserting the detail and complexity it is hoped to demonstrate that far from a single uniform homologous culture there existed residual even resistant and regional cultures The account it is hoped presents a cohesive new narrative of the cultural implications of personal naming in England whilst also addressing important issues of gender politics and social organization

Town and Countryside in Western Berkshire, C.1327-c.1600 Margaret Yates, 2007 A fresh examination of how society and economy changed at the end of the middle ages comparing urban and rural experience The traditional boundary between the medieval and early modern periods is challenged in this new study of social and economic change that bridges the fifteenth and sixteenth centuries It addresses the large historical questions what changed when and why through a detailed case study of western Berkshire and Newbury integrating the experiences of both town and countryside Newbury is of particular interest being a rising cloth manufacturing centre that had contacts with London and overseas due to its specialist production of kerseys The evidence comes from original documentary research and the data are clearly presented in tables and graphs It is a book alive with the actions of people famous men such as the clothier John Winchcombe known as Jack of Newbury but more notably by the hundreds of individuals such as William Eyston or Isabella Bullford who acquired property cultivated their lands or in the case of Isabella managed the mill complex after her husband's death MARGARET YATES is Lecturer in History at the University of Reading
