NeSmith, 2021-03-07

What we know about teaching Teenagers 2019 I would like to thank Dr Richard NeSmith for helping me know more about what goes through teenagers minds and grow into a better teacher Dr NeSmith s 28 plus years of teaching experience and careful study of biology developmental and cognitive psychology make him one of the best experts in the field His book explains the difficulties students have learning at school and reflects on how to overcome them promoting a better understanding of the changes going on in teenagers lives as well as an elementary understanding of what causes pain points in the brain of the adult in the making Above all Dr NeSmith reminds us that teenagers are individuals with their personality strengths weaknesses and their ways of showing love and concern The book has been carefully researched and will make you aware of the cognitive emotional interactions going on inside the mind of preadolescents to improve your teaching strategies It is such a privilege to teach and take teenagers from childhood to adulthood Whether you are a parent a teacher or a school administrator you will find in this book strategies to facilitate learning and encourage lifelong learning A research based book addressing brain based learning and how secondary age students best learn and how teachers can best teach to meet those needs American public education is on life support like never before Why The shift from LEARNING to standardized testing ticking boxes for administrators and watering down curricula are some of the reasons This synthesis of brain based research emphasizes how students best learn It is NOT a checklist it is a strategy that empowered teachers can utilize to improve student learning But knowing how teens think enables teachers to know HOW TEENS best LEARN Dr Richard NeSmith *The Complete HIV/AIDS Teaching Kit* Josefina J.
