[Cooking in America, 1590-1840](#) Trudy Eden, 2006-08-30 There are no recipes for what the Indians ate in Colonial times but this cookbook uses period quotations to detail what and how the foodstuffs were prepared The bulk of the cookbook is devoted to what the

European immigrants cooked and what evolved into American cooking The first colonists from England brought their foodways to America The basic foods that Americans of European descent ate changed very little from 1600 to 1840 While the major basic foods remained the same their part in the total diet changed Americans at the end of the period ate far more beef and chicken than did the first colonists They used more milk butter and cream They also ate more wheat in the form of breads cakes cookies crackers and cereals The same was true with fruits Over time the more exotic vegetables like broccoli cauliflower artichokes and numerous root vegetables including both sweet and white potatoes became common vegetables By the end of this period many Americans were even eating foods like tomatoes okra and sesame which were unknown to their ancestors In addition Americans like their relatives in Europe incorporated coffee tea and chocolate into their diets as well as more sugar Along with them came new customs such as tea time and for men socializing at coffeehouses Also distilled beverages particularly rum which was often made into a punch with citrus juices were increasingly used Basic cooking technology also remained the same throughout the period and the cookbook gives a sense of how meals were prepared The open hearth provided the major heat source As time passed though more and more people could afford to have wood fired brick ovens in their homes Although the recipes presented here from the first century of colonization come from cookbooks written for people of upper status by the end of the time period literacy rates were much higher among men and women European and American authors published numerous cookbooks that were relatively inexpensive and available so it is reasonable to assume that those recipes were representative of actual American cookery practices Many changes occurred to cookbooks and recipes during this period The recipes became more detailed and more reliant on standard measures and the recipes were for foods that are less complicated and expensive to prepare This fact is more a sign that cookbooks were being written for a less wealthy group of readers than that tastes and appetites had changed The trend toward simple and frugal foods continued up to 1840 and beyond a sign that readership had expanded as well as an indicator of what the bulk of Americans were eating As well recipes that were considered American were developed All of these recipes are in their original form and have been taken from contemporary published or private cookbooks The explanations after the recipes give historical information and suggestions if the recipe is vague or if it calls for an unusual ingredient Dining tips are included as well Period illustrations complement the recipes

Cooking in America, 1840-1945 Alice L. McLean, 2006-08-30 This cookbook covers the years 1840 through 1945 a time during which American cookery underwent a full scale revolution Gas and electric stoves replaced hearth cookery Milk products came from commercial dairy farms rather than the family cow Daily meals were no longer bound by seasons and regions as canned bottled and eventually frozen products flooded the market and trains began to transport produce and meat from one end of the country to the other During two World Wars and the Great Depression women entered the work force in unprecedented numbers and household servants abandoned low paying domestic jobs to work in factories As a result of these monumental changes American home cooking became

irrevocably simplified and cookery skills geared more toward juggling time to comb grocery store shelves for the best and most economical products than toward butchering and preserving an entire animal carcass or pickling fruits and vegetables. This cookbook reflects these changes with each of the three chapters capturing the home cooking that typified the era. The first chapter covers the pre industrial period 1840 to 1875 during this time home cooks knew how to broil roast grill fry and boil on an open hearth flame and its embers without getting severely injured. They also handled whole sheep carcasses made gelatin from boiled pigs trotters grew their own yeast and prepared their own preserves. The second chapter covers 1876 through 1910 a time when rapid urbanization transformed the United States from an agrarian society into an industrial giant giving rise to food corporations such as Armour Swift Campbell s Heinz and Pillsbury. The mass production and mass marketing of commercial foods began to transform home cooking meat could be purchased from a local butcher or grocery store and commercial gelatin became widely available. While many cooks still made their own pickles and preserves commercial varieties multiplied. From 1910 to 1945 the period covered by Chapter 3 the home cook became a full fledged consumer and the national food supply became standardized to a large extent. As the industrialization of the American food supply progressed commercially produced breads pastries sauces pickles and preserves began to take over kitchen cupboards and undermine the home cooks ability to produce their own meals from scratch. The recipes have been culled from some of the most popular commercial and community cookbooks of the nineteenth and early twentieth centuries. Taken together the more than 300 recipes reflect the major cookbook trends of the era. Suggested menus are provided for replicating entire meals.
