Six Centuries of Work and Wages James E Thorold Rogers, 2015-07-09 Excerpt from Six Centuries of Work and Wages The History of English Labour Since I published nearly eighteen years ago the first two volumes of my history of agriculture and prices I have been frequently urged to extract and exhibit those parts of my researches which illustrate the history of labour and wages To have done this to any purpose it was necessary that I should have in my possession such a continuous record of wages actually earned as would enable me to traverse the whole of the six centuries which intervene between the time at which the first information begins and that at which our present experience concludes I have already published the facts which bear on more than half the whole period i e for 324 years and I have collected evidence as yet unpublished for 120 years more i e for the 444 years which begin with the forty third year of Henry III 1258 9 and conclude with the first of Anne 1702 3 Sufficient information for the residue has been supplied from the writings of Arthur Young and Sir Frederic Eden in the eighteenth century and from numerous writers in the nineteenth the principal authority in the latter period being Porter It would have been of little value to have collected evidence as to the wages of labour unless I had also been in possession of adequate information as to general prices from which to estimate precisely what was the purchasing power of wages About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the
