The Law and Economics of Child Support Payments William S. Comanor, 2004-01-01 This urgently needed groundbreaking book provides solid data that coincides with the real life stories I have been hearing for years from men and women nationwide regarding unfair child support laws and policies that have resulted in adverse effects on their children and families I anticipate that this book will have a major positive impact on social policy and the general collective attitudes toward families in today's society The information presented in this book must be read and understood by every policymaker to insure that child support policies are made just and fair so that all families can prosper Dianna Thompson National Family Justice Association US The delinquent payment of child support by non custodial to custodial parents is a major problem throughout the United States To many observers the problem is one of deadbeat dads men who simply will not make the required payments The solution has been to enforce payment by the imposition of increasingly stringent civil and criminal penalties Despite these efforts the percentage of single mothers receiving child support has changed very little over the past twenty five years The Law and Economics of Child Support Payments investigates why this is and approaches the payment of child support as an economic problem

display matches the criteria the professor sets up The students in this study had to determine which content would or would not match these criteria which of six types of information facts concepts connections processes principles or metainformation e g rhetorical patterns were desired and how best to supply them To move content from source to target they used four operations These include exposure making themselves conscious of the information extraction a process of selecting information manipulation changing or synthesizing information and display showing the information Greater awareness of this Design led to greater success Pedagogical implications of this model include establishing a more realistic curricula for academic literacy programs and educating professors to better match grading criteria with learning goals
