Routledge Handbook of Entrepreneurship in Developing Economies Colin C. Williams, Anjula Gurtoo, 2016-07-22

The Routledge Handbook of Entrepreneurship in Developing Economies is a landmark volume that offers a uniquely comprehensive overview of entrepreneurship in developing countries. Addressing the multi-faceted nature of entrepreneurship, chapters explore a vast range of subject areas including education, economic policy, gender, and the prevalence and nature of informal sector entrepreneurship. In order to understand the process of new venture creation in developing economies, what it means to be engaged in entrepreneurship in a developing world context must be addressed. This handbook does so by exploring the difficulties, risks, and rewards associated with being an entrepreneur and evaluates the impacts of the environment, relationships, performance, and policy dynamics on small and entrepreneurial firms in developing economies. The handbook brings together a unique collection of over forty international researchers who are all actively engaged in studying entrepreneurship in a developing world context. The chapters offer concise but detailed perspectives and explanations on key aspects of the subject across a diverse array of developing economies spanning Africa, Asia, Latin America, and Eastern Europe. In doing so, the chapters highlight the heterogeneity of entrepreneurship in developed economies and contribute to the on-going policy discourses for managing and promoting entrepreneurial growth in the developing world. The book will be of great interest to scholars, students, and policymakers in the areas of development economics, business, and management, public policy, and development studies. *Entrepreneurship, Innovation, and Sustainable Growth* Nader H. Asgary, Emerson A. Maccari, Heloisa C. Hollnagel, Ricardo L.P. Bueno, 2024-03-20

Entrepreneurship and innovation play a vital role in fostering sustainable development. Advances in technology and communications have both transformed the process of business and strengthened the role of entrepreneurship in developed and developing countries. This new edition of *Entrepreneurship, Innovation, and Sustainable Growth* provides the fundamental concepts and applications for faculty and students in this field and also serves as a professional reference for practicing entrepreneurs and policymakers. Each chapter provides a clear guide to the conceptual and practical elements that characterize entrepreneurship and the process of new venture formation, including functional strategies in key areas such as marketing, information technology, human resources management, and accounting and finance. Updated throughout to take account of recent developments in topics such as environmental impacts, diversity, and inclusion, and COVID-19, the book is a comprehensive and holistic approach to the theory, policy, and practice of entrepreneurship and innovation. Keeping practicality as the book's core aim, all chapters include a long case study to set the scene and then draw upon shorter cases from both developing and developed countries to reinforce key learning objectives and the real-world application of the book's core concepts. With new questions and exercises presented throughout in order to encourage discussion and problem-solving, quick summaries of the important concepts and definitions, and extensive support for lecturers and students, *Entrepreneurship, Innovation, and Sustainable Growth* Second Edition is ideal for students at undergraduate and

postgraduate level

Enterprising Worlds Jay D. Gatrell, Neil Reid, 2007-05-16 Enterprising World represents the culmination of several years of work by geographers, planners and economists. The chapters represent the collective efforts of the International Geographical Union's Commission on the Dynamics of Economic Spaces. This collection is the result of the 2005 annual meeting in Toledo, Ohio, USA. The chapters have been selected based on their contribution to the broader community of economic geographers and policymakers and to demonstrate the inherent interconnectedness of these themes and at times the conceptual tension that exists between ethics, economics and the environment insofar as these important issues shape the contours and cleavages of contemporary regional development. In particular, the chapters represent the diversity of perspectives on these issues. The authors provide insight into the workings of a variety of communities, regions and nations as they seek to balance economic growth with the growing necessity to simultaneously promote ethical and sustainable regional development. As such, this book is truly international in both scale and scope and provides the reader with a survey of emerging and established concepts, theories and conflicts in economic geography.
