**Theory after Derrida** Kailash C. Baral, R. Radhakrishnan, 2012-04-27 A critical anthology that re examines Jacques Derrida s thought by way of theory and praxis this volume reflects on his striking legacy and the future of theory Among contemporary thinkers Derrida challenges not only our ways of thinking but also hitherto methods of critical inquiry In the attempt to renovate and re energise philosophy Derrida questions the fundamental assumptions of Western philosophical thought and in turn exposes the intricate lie behind binaries such as speech writing nature culture male female black white literature criticism etc which have continued to shape our worldview where a hegemonic centre is always already in place dominating marginalising the other This book explores not only the status of Derrida s contribution as a critical thinker but also the status of critical theory as such in the contemporary milieu The central question that it asks is whether we should dismiss Derrida as a thinker who espoused an extreme form of relativism bordering on nihilism or has he something fundamental to contribute to the future of theory Could it be that deconstruction is not destruction but a possibility that casts doubts on whether the present can have faith in future The volume addresses some important concerns of our times such as religious practice art and aesthetics translation sociology of philosophy and democracy making a significant contribution to literary theory Scholars of English literature philosophy sociology and cultural studies will find this work particularly appealing

On the Boundary Fred Dallmayr, 2017-08-29 The book records the author s personal and intellectual maturation over a period of nine decades This maturation was never purely self propelled but always occurred in response to teachings and experiences Situated as a being in the world the author s experiences reach from World War II via the Cold War to recent terror wars Intellectually he participated in and reacted to a number of major perspectives from

phenomenology existentialism and critical theory to hermeneutics postmodernism and post secularism Exchanges with multiples interlocutors helped to shape his distinctive outlook or profile which privileges self other contacts over the ego dialogue over monologue and dialogical cosmopolitanism over chauvinistic power politics Implicit in this emerging profile is a preference for potentiality over actuality and of relationality over static identity Shunning doctrinal formulas or finished systems the author s life thus is shown to be simply a journey an adventure to what comes an itinerary mentis in Deum

theory cross cultural philosophy and interdisciplinary scholarship In one of his earliest publications *The Crisis of Political Understanding* 1979 Jung described the urgency and necessity of breakthrough in political thinking as a crisis and he followed up on this issue for his half century of scholarship by introducing Asian philosophy and political thought to Western scholarship demonstrating the possibility of cross cultural philosophical thinking In his most recent publications Jung refers to this possibility as transversality or trans universality a concept which should replace the outmoded Eurocentric universality of modernist philosophy Jung expounds that in transversality differences are negotiated and compromised rather than effaced and absorbed into sameness This volume is a testimony to the very possibility of     The SAGE Handbook of Social Gerontology Dale Dannefer,Chris Phillipson,2010-08-13 This SAGE Handbook integrates basic research on social dimensions of aging It presents programmatic applications of research in areas not often seen in Handbooks including imprisonment technology and aging urban society aged and elderly migration The authors constitute a Who's Who of international gerontology and the focus on globalization and aging is unique among Handbooks today This Handbook should be in the library of every social gerontologist Vern L Bengtson Professor of Gerontology University of Southern California This volume reflects the emergence of ageing as a global concern including chapters by international scholars from Asia Australasia Europe and North America It provides a comprehensive overview of key trends and issues in the field drawing upon the full range of social science disciplines The Handbook is organized into five parts each exploring different aspects of research into social aspects of ageing Disciplinary overviews summaries of findings from key disciplinary areas within social gerontology Social relationships and social differences explores area like social inequality gender religion inter generational ties social networks and friendships Individual characteristics and change in later life examines different aspects of individual aging including self and identity cognitive processes and bio social interactions and their impact on physical and psychological aging Comparative perspectives and cultural innovations topics include ageing and development ageing in a global context migration and cross cultural perspectives on grandparenthood Policy issues covering policy concerns such as long term care technology and older people end of life issues work and retirement and the politics of old age This will be essential reading for all students researchers and policy makers concerned with the major issues influencing the lives of older people across the globe     **The Welfare State in Post-Industrial Society** Jason L. Powell,Jon Hendricks,2009-06-10 In recent years major social forces such as ageing populations social trends migration patterns and the globalization of economies have reshaped social welfare policies and practices across the globe Multinational corporations NGOs and other international organizations have begun to influence social policy at a national and local level Among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation states to effect policies that are beneficial to them on a local level With contributions from thirteen countries worldwide this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state *The Welfare State in Post*

Industrial Society is divided into two major sections the first draws from a number of leading social welfare researchers from diverse countries who point to the nation state as case studies highlighting how it goes about establishing and revising social welfare provisions The second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship ageing and marketization The Welfare State in Post Industrial Society seeks to encourage debate about the implications of the most pressing social welfare issues in nation states and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations

**Western Political Thought in Dialogue with Asia** Cary J. Nederman, Takashi Shogimen, 2008-12-16 Given the rise of globalization and coinciding increase in cultural clashes among diverse nations it has become eminently clear to scholars of political thought that there exists a critical gap in the knowledge of non Western philosophies and how Western thought has been influenced by them This gap has led to a severely diminished capacity of both state and nonstate actors to communicate effectively on a global scale The political theorists area scholars and intellectual historians gathered here by Takashi Shogimen and Cary J Nederman examine the exchange of political ideas between Europe and Asia from the Middle Ages to the early twentieth century They establish the need for comparative political thought showing that in order to fully grasp the origins and achievements of the West historians of political thought must incorporate Asian political discourse and ideas into their understanding By engaging in comparative studies this volume proves the necessity of a cross disciplinary approach in guiding the study of the global history of political thought

Liberalism for a New Century Neil Jumonville, Kevin Mattson, 2007-06-04 American liberalism today is in a state of confusion and disarray with the L word widely considered a term of derision By examining both the historical past and the fractious present Liberalism for a New Century restores a proud political tradition and carves out a formidable defense of its philosophical tenets This manifesto for a New Liberalism issues an urgent and cogent call for the most important rethinking of its values since the late 1960s when conservatives reenergized themselves after Barry Goldwater s infamous loss The essays in this volume most of them never before published are written by a leading group of historians journalists and public intellectuals Some of the nation s most highly respected liberal minds explore such topics as the classical liberal tradition postmodernism s challenge to the American Enlightenment the civil rights era the influence of twentieth century radicals on American liberalism the 1950s tolerance the cold war and whether liberalism should have a large and aggressive vision One essay considers liberalism in Iran and what American liberals might learn from this movement Fast paced and encompassing such hot button issues as the family and religion here are ringside seat arguments between people who don t often get to engage with one another right leaning liberals like Peter Berkowitz and John Patrick Diggins and leftier liberals like Michael Tomasky and Mona Harrington The result is a lively and stimulating collection that articulates a clear minded alternative to the conservative ascendancy in American history and offers a timely and essential contribution to the growing national debate
