In the Information Society the smart card or smart device with its processing power and link to its owner will be the potential
human representation or delegate in Ambient Intelligence Pervasive Computing where every appliance or computer will be
connected and where control and trust of the personal environment will be the next decade challenge Smart card research is
of increasing importance as the need for information security grows rapidly Smart cards will play a very large role in ID
management in secure systems In many computer science areas smart cards introduce new dimensions and opportunities
Disciplines like hardware design operating systems modeling systems cryptography and distributed systems find new areas
of applications or issues smart cards also create new challenges for these domains CARDIS the IFIP Conference on Smart
Card Research and Advanced Applications gathers researchers and technologists who are focused in all aspects of the design
development deployment validation and application of smart cards or smart personal devices This volume contains the 20
papers that have been selected by the CARDIS Program Committee for presentation at the 6th International Conference on
Smart Card Research and Advanced Applications CARDIS 2004 which was held in conjunction with the IFIP 18th World
Computer Congress in Toulouse France in August 2004 and sponsored by the International Federation for Information
Processing IFIP With 20% of the papers coming from Asia 20% from America and 60% from Europe the competition was

particularly severe this year with only 20 papers selected out of 45 very good submissions
