FRANS LANTING WILDLIFE - 2005 TASCHEN DIARY TASCHEN,2004-10-01 **Into Africa: Hardcover Ruled Journal** Frans Lanting,2030-10-10 Journey Into Africa with National Geographic photographer Frans Lanting and record all of your adventures in this lined journal featuring Lanting's surreal and inspirational photos of Africa and its iconic animals. The Into Africa exhibit at the Smithsonian features more than thirty years of fieldwork in Africa by Frans Lanting, one of the world's most renowned nature photographers. The exhibit was produced as a partnership with the Smithsonian's National Museum of Natural History, the National Geographic Society, and the World Wildlife Fund. During three decades of fieldwork and assignments for National Geographic, Lanting encountered otherworldly vistas and captured moments of intimacy with some of the world's most iconic animals. As seen in these colorful endpapers and meditative cover, Lanting creates an enduring vision of Africa and demonstrates what is at stake for its wildlife and wild places. This journal features iconic images from the Into Africa exhibit on the cover and the endpapers. With sturdy construction and sewn binding, this journal lies flat, and the 192 lined acid-free pages of high quality heavy stock paper take both pen and pencil nicely to invite a flow of inspiration. All this plus a ribbon placeholder, elastic closure, and 7.5 x 4.5 inch back pocket perfect for holding photographs and mementos makes this journal a must-have for any fans who love the natural world, fine photography, Africa, or journaling.

The Photographic Journal, 1992 Vols for 1853 include the transactions of the Royal Photographic Society of Great Britain. BBC Wildlife, 2006 **The Amicus Journal**, 1987 The Earth and I Arthur Firstenberg, 2025-01-07. Almost all environmental books treat the environmental crisis as though humans are in charge of nature rather than part of it. *The Earth and I* is the first book to put all preconceived notions aside and to ask na-vely: Who are we really? What is our relationship to the earth? How is it possible that we, out of all the millions of species, have come to destroy our common home? The answers are surprising and have far-reaching implications for those searching for solutions. Part One tells what is happening to the earth's systems and how they are being destroyed. It rewrites the two million year history of humanity's tenure on the earth as if we are part of nature and not separate from it, and describes both the earth and the universe as living systems. It paints a global coherent picture of the devastation to Earth's air, water, forests, and creatures that is not found elsewhere. It reviews assaults on these systems that are not treated adequately, if at all, elsewhere: chemicals, radiation, plastics, detergents, biocides, noise, cars, and guns. Part Two, *Digging below the Surface*, asks why and enters territory not previously explored by environmentalists. It describes the various ways to make a living on the earth: hunting and gathering, shifting agriculture, nomadic herding, settled agriculture, and industrial technology as choices not eras, choices coexisting with one another until today. It rewrites economics. It explores the relationship of warfare, slavery, religion, and human sexuality to the environmental crisis. And it is forced to conclude that these aspects of human culture are not only shaped but created by the technologies we use; that the use of non-human sources of energy interferes with human psychological development and that the unfulfilled

urges within us explode in the violent technologies that are destroying our planet The solutions if it is not too late therefore lie in wise choice rather than wise use of our technologies **The British Journal of Photography** ,2006 **Thank You, Madagascar** Alison Jolly,2015-03-12 An enchanting book poignant and passionate Geographical A captivating and absorbing account Sir David Attenborough Madagascar is one of the world s natural jewels with over ninety per cent of its wildlife found nowhere else on Earth Few people knew it better than the pioneering primatologist and conservationist Alison Jolly Thank You Madagascar is her eyewitness account of the extraordinary biodiversity of the island and the environment of its people At the book s heart is a conflict between three different views of nature Is the extraordinary forest treasure house of Madagascar a heritage for the entire world Is it a legacy of the forest dwellers ancestors bequeathed to serve the needs of their living descendants Or is it an economic resource to be pillaged for short term gain and to be preserved only to deliver benefits for those with political power Exploring and questioning these different views this is a beautifully written diary and a tribute to Madagascar **A Kangaroo's Life** Ellen Lawrence,2012-01-01 A young child in Australia becomes interested in an injured red kangaroo that her rehabilitator parents are helping to treat The kangaroo has a baby called a joey in its pouch Readers will follow along as the narrator observes the development of the joey as it grows from a tiny baby the size of a cherry into an adult kangaroo the largest marsupial in the world Colorful photos diagrams and clear age appropriate text will engage young readers as they explore the life cycle natural habitat physical characteristics diet and behavior of these incredible creatures The diary format models scientific observation and critical thinking and encourages children to keep notebooks recording their own investigations into the natural world *The Skeptical Environmentalist* Bjørn Lomborg,2001-08-30 The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse The author himself a former member of Greenpeace is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence Using the best available statistical information from internationally recognised research institutes Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world His arguments are presented in non technical accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves Concluding that there are more reasons for optimism than pessimism Bjørn Lomborg stresses the need for clear headed prioritisation of resources to tackle real not imagined problems The Skeptical Environmentalist offers readers a non partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media
