renewable fuel alternatives have been suggested accompanied by imaginaries of how these technologies will contribute to a better future. These imaginaries have a wide ranging impact because the implementation of each alternative technology will require the build up of multifarious socio technical ensembles that support their use. As a result replacing fossil fuels with these renewable alternatives is likely to be a complex process. This dissertation considers the emergence of two such visions of renewable fuels studying imaginaries of biogas and electricity in the Swedish context. Biogas has a long history of use as a transport fuel in Sweden where although it makes up a small percentage of total fuel use it also forms the basis of numerous municipal public transport systems. Meanwhile electric vehicles have become increasingly attractive as more actors subscribe to an imaginary that sees the future of vehicles as shared autonomous and electric. This interaction is exemplified in urban public transportation as many municipalities begin to implement electric buses in an attempt to increase energy efficiency and reduce pollution. This thesis follows three case studies where the imaginaries of biogas and electric vehicles interact urban public transport in the municipalities of Linköping and Malmö and analysis of a comprehensive national policy document *Fossil fuel freedom on the road*. It contributes to a wider understanding of how visions can influence obduracy and change of transport alternatives within the wider transformation to a fossil fuel free future.

The Future Will Be BS Free Will McIntosh, 2018-07-24. In this terrifyingly timely tale for fans of *The Eye of Minds* a teen and his group of friends find themselves on the run after using a genius lie detector contraption to expose their corrupt government. In a Putin esque near future America the gifted and talented high school has just been eliminated and Sam and his friends have been using their unexpected free time to work on a tiny undetectable utterly reliable lie detector. They're all in it for the money except Theo their visionary. For Theo it's about creating a better world. A BS free world where no one can lie and the honest will thrive. Just when they finish the prototype and turn down an offer to sell their brainchild to a huge corporation Theo is found dead. Greedy companies corrupt privatized police and even the president herself will stop at nothing to steal the Truth App. Sam sets his sights on exposing all lies and holding everyone accountable. But he and his friends quickly realize the costs of a BS free world the lives of loved ones and political and economic stability. They now face a difficult question. Is the world capable of operating without lies or are lies what hold it together. Deserving of comparisons to *The Hunger Games* Kirkus. This compelling action packed story will have readers eagerly turning pages. Give to fans of Cory Doctorow's *Little Brother* SLJ. The action is nonstop from beginning to end. A BS free way to present a deep and fundamental question. Booklist
