Gulf War Robert L. Pfaltzgraff, Richard H. Shultz, 1992 This collection of essays reflects the proceedings of a 1991 conference on The United States Air Force Aerospace Challenges and Missions in the 1990s sponsored by the USAF and Tufts University The 20 contributors comment on the pivotal role of airpower in the war with Iraq and address issues and choices facing the USAF such as the factors that are reshaping strategies and missions the future role and structure of airpower as an element of US power projection and the aerospace industry's views on what the Air Force of the future will set as its acquisition priorities and strategies The authors agree that aerospace forces will be an essential and formidable tool in US security policies into the next century The contributors include academics high level military leaders government officials journalists and top executives from aerospace and defense contractors The Future of NATO Airpower Justin

Bronk, 2020-05-31 Airpower remains the cornerstone of NATO's military advantage so maintaining the ability to win air superiority over peer opponents in a conflict is key to long term deterrence stability in both Europe and the Pacific This Whitehall Paper examines the various modernisation and future capability development efforts being undertaken within NATO and analyses the major threat systems and overall modernisation trends of the West's main peer competitors Russia and China US airpower capability development efforts are increasingly focused on countering the growing challenge from the Chinese military in the Pacific To meet this challenge the Pentagon is planning to transform the way it operates across all domains over the next 15 years New platforms weapons systems and increasing automation of command and control threaten to leave NATO allies behind Current acquisition and modernisation plans of European air forces may eventually close the capability gap with current US theatre entry standard capabilities but by then the US will have leapt ahead once more

Furthermore many of the airpower capabilities which the US is pursuing for the Pacific theatre are significantly less relevant for the demands of deterrence against Russia in Europe Given continuing dependence on US enablers on the part of other NATO members a significant divergence in capability plans threatens to undermine crucial Alliance interoperability if not recognised and managed early

Bechtol, 2008-10 US military support to the Republic of Korea ROK remains critical to peace and stability Author Dr Bruce E Bechtol Jr details constraints faced by the army of the Democratic People's Republic of Korea DRPK in any attempt to invade the ROK Although much of the surface based defense capability in the South is transitioning to the ROK army a strong U S airpower presence demonstrates U S commitment to Korean security counterbalances the DPRK's offensive systems and deters war Illustrations

Airpower, Afghanistan, and the Future of Warfare: An Alternative View Craig D. Wills, 2010-04-19 The author argues that the 20th century argument between air and ground proponents has changed significantly since the Gulf War and that it comes down to the relative importance of the ground or air in the mix It is more than just using air as a supporting component to the ground forces if this is true current force organization and employment are adequate However if the air predominates in combat operations then as Wills puts it in his first chapter joint operations doctrine needs to be rethought A changed balance will affect the military at every level force structure organization weapons acquisition doctrine and training Colonel Wills was the operations officer of the 493d Fighter Squadron Grim Reapers at Royal Air Force Lakenheath United Kingdom Originally published by Air University Press

Gray, 2012-08-04 The U S has long suffered from a serious strategy deficit In short there is a general crisis of strategic comprehension a lack of agreement on the most effective organizing ideas Airpower is by no means lonely in suffering from strategic theoretical uncertainty The study argues that the

United States needs a theory of war and warfare It claims that future warfare will be diverse and that the tactical operational and strategic value of airpower must always be situational A coherent theory of employment for all of airpower s capabilities not only the kinetic is needed Airpower s potential utility lies within a spectrum of possibilities and is dependent on context The study advises frank recognition of airpower s situational limitations Dr Colin S Gray is Professor of International Politics and Strategic Studies at the University of Reading in England Originally published by the Airpower Research Institute
