Coffman,1924 **Myth and the Human Sciences** Angus Nicholls,2014-12-05 This is the first book length critical analysis in any language of Hans Blumenberg s theory of myth Blumenberg can be regarded as the most important German theorist of myth of the second half of the twentieth century and his Work on Myth 1979 has resonated across disciplines ranging from literary theory via philosophy religious studies and anthropology to the history and philosophy of science Nicholls introduces Anglophone readers to Blumenberg s biography and to his philosophical contexts He elucidates Blumenberg s theory of myth by relating it to three important developments in late nineteenth and early twentieth century German philosophy hermeneutics phenomenology and philosophical anthropology while also comparing Blumenberg s ideas with those of other prominent theorists of myth such as Vico Hume Schelling Max M ller Frazer Sorel Freud Cassirer Heidegger Horkheimer and Adorno According to Nicholls Blumenberg s theory of myth can only be understood in relation to the human sciences since it emerges from a speculative hypothesis concerning the emergence of the earliest human beings For Blumenberg myth was originally a cultural adaptation that constituted the human attempt to deal with anxieties concerning the threatening forces of nature by anthropomorphizing those forces into mythic images In the final two chapters Blumenberg s theory of myth is placed within the post war political context of West Germany Through a consideration of Blumenberg s exchanges with Carl Schmitt as well as by analysing unpublished correspondence and parts of the original Work of Myth manuscript that Blumenberg held back from publication Nicholls shows that Blumenberg s theory of myth also amounted to a reckoning with the legacy of National Socialism The Human Legend N. the subconscious of several generations This is what happened with the rumour about a human sausage factory after the Second World War In Tartu Estonia this rumour obtained a symbolic meaning and power due to the politics of the totalitarian Soviet regime The memories of the post war period are still vivid in the collective mind and the onetime rumour of sausage factories incorporates the population s tensions pain loss choices defiance and irreconcilability The individual and community emotions that are brought to a focus in this discourse are an indicator of defining social boundaries and behaviour of us and them When describing the events that took place in Tartu folklore becomes a powerful tool with which to construe the meaning of the era at the social level Through documents photos and people s memories the book offers an insight into the city of Tartu after the Second World War and reveals the several layers of meaning represented by rumour in this period

Science Fiction, Ethics and the Human Condition Christian Baron, Peter Nicolai Halvorsen, Christine Cornea, 2017-07-10 This book explores what science fiction can tell us about the human condition in a technological world with the ethical dilemmas and consequences that this entails This book is the result of the joint efforts of scholars and scientists from various disciplines This interdisciplinary approach sets an example for those who like us have been busy assessing the ways in which fictional attempts to fathom the possibilities of science and technology speak to central concerns about what it means to be human in a contemporary world of technology and which ethical dilemmas it brings along One of the aims of this book is to demonstrate what can be achieved in approaching science fiction as a kind of imaginary laboratory for experimentation where visions of human or even post human life under various scientific technological or natural conditions that differ from our own situation can be thought through and commented upon Although a scholarly work this book is also designed to be accessible to a general audience that has an interest in science fiction as well as to a broader academic audience interested in ethical questions
