[The Fourth Dimension](#) Rudy Rucker, 1986 **The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition** Linda Dalrymple Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak **Xenolinguistics** Diana Slattery, 2015-01-06 Are language and consciousness co evolving Can psychedelic experience cast light on this topic In the Western world we stand at the dawn of the psychedelic age with advances in neuroscience a proliferation of new psychoactive substances both legal and illegal the anthropology of ayahuasca use and new discoveries in ethnobotany From scientific papers to the individual trip reports on the Vaults of Erowid and the life work of Terence McKenna Alexander and Ann Shulgin and Stanislav Grof we are converging on new knowledge of the mind and how to shift its functioning for therapeutic spiritual problem solving artistic and or recreational purposes In our culture psychonautics the practices of individuals and small groups using techniques such as meditation shamanic ritual ecstatic dance and substances such as LSD and psilocybin for personal exploration is a field of action and thought in its infancy The use of psychonautic practice as a site of research and a method of knowledge production is central to this work the first in depth book focusing on psychedelics consciousness and language *Xenolinguistics* documents the author s eleven year adventure of psychonautic exploration and

scholarly research her original intent was to understand a symbolic language system Glide she acquired in an altered state of consciousness What began as a deeply personal search led to the discovery of others dubbed xenolinguists with their own unique linguistic objects and ideas about language from the psychedelic sphere The search expanded sifting through fields of knowledge such as anthropology and neurophenomenology to build maps and models to contextualize these experiences The book presents a collection of these linguistic artifacts from glossolalia to alien scripts washed ashore like messages in bottles signals from Psyche and the alien Others who populate her hyperdimensional landscapes With an entire chapter dedicated to Terence and Dennis McKenna and sections dedicated to numerous other xenolinguists this book will appeal to those

interested in language linguistics and the benefits of psychedelic self exploration and to readers of science fiction Knots and Borromean Rings, Rep-Tiles, and Eight Queens Martin Gardner, 2014-09-15 Find new twists on knotted molecules the hangman s paradox cat s cradle gambling peg solitaire pi and e in this book Think of a Number M. Charles Chavunduka, Walter Timo De Vries, Pamela Duran Diaz, 2022-04-24 This book clarifies the smart city concept that is
gaining application in Sub-Saharan Africa. It shows how the smart concept can be used to address problems that would be
difficult and more expensive to solve using traditional techniques such as employment creation. This is done through
elaboration of the African interpretation of smartness using tools for smart solid waste management, e-governance, smart
energy and smart infrastructure. The case studies selected in each chapter explain a different dimension of the smart city
concept and offer innovative solutions to problems of rapid urbanization. It lays the theoretical foundation for further
research on smart cities and rural areas in Africa. Algebra: Themes, Tools, Concepts -- Teachers' Edition Henri
