The fourth discontinuity Bruce Mazlish, 1967 **Terminal Identity** Scott Bukatman, 1993 Scott Bukatman's Terminal Identity referring to both the site of the termination of the conventional subject and the birth of a new subjectivity constructed at the computer terminal or television screen puts to rest any lingering doubts of the significance of science fiction in contemporary cultural studies Demonstrating a comprehensive knowledge both of the history of science fiction narrative from its earliest origins and of cultural theory and philosophy Bukatman redefines the nature of human identity in the Information Age Drawing on a wide range of contemporary theories of the postmodern including Fredric Jameson Donna Haraway and Jean Baudrillard Bukatman begins with the proposition that Western culture is suffering a crisis brought on by advanced electronic technologies Then in a series of chapters richly supported by analyses of literary texts visual arts film video television comics computer games and graphics Bukatman takes the reader on an odyssey that traces the postmodern subject from its current crisis through its close encounters with technology and finally to new self recognition This new virtual subject as Bukatman defines it situates the human and the technological as coexistent codependent and mutually defining Synthesizing the most provocative theories of postmodern culture with a truly encyclopedic treatment of the relevant media this volume sets a new standard in the study of science fiction a category that itself may be redefined in light of this work Bukatman not only offers the most detailed map to date of the intellectual terrain of postmodern technology studies he arrives at new frontiers providing a propitious launching point for further inquiries into the relationship of electronic technology and culture **The Evolution of Geotech - 25 Years of Innovation** Reginald Hammah, Thamer Yacoub, Alison McQuillan, John Curran, 2021-11-23 This publication includes 82 technical papers presented at Rocscience International Conference RIC 2021 held online on April 20 and 21 2021 Rocscience created this event to bring geotechnical academics researchers and practitioners together to exchange ideas as part of celebrating 25 years of the company's existence The papers in these proceedings were from keynotes panel discussions and papers selected after careful review of over 100 technical submissions delivered at RIC 2021 The technical papers were grouped into sessions based on their subject areas The conference aimed to stimulate discussions that could help the industry work towards overcoming geotechnical engineering limitations today It also sought to foster creative thinking that will advance the current states of the art and practice The keynote addresses panel discussions and technical presentations tried to examine geotechnical problems and situations from fresh perspectives RIC 2021 hopes that the proceedings will continue to enrich our thinking and contribute to achieving a critical mass of change in our practices and approaches We look forward to significant improvements in our
