Culture of Crisis and Extinction Kim Thu Le, 2024-10-14 Culture of Crisis and Extinction Idealism and Ideology Expressed in Arts and Architectural Forms explores the mythology of cultures in crisis tracing the symptoms that lead to their destruction and eventual extinction Through a comprehensive range of research methods and strategies tailored to each fieldwork project this book investigates cultural phenomena across various environments It uncovers significant historical meanings that are often hidden or absent from mainstream publications By analyzing cultural transitions through economic political and ethnic lenses across Europe and Asia the book provides an in depth examination of collective action and the root causes of cultural crises Spanning six chapters it identifies the myths surrounding cultural conflicts and crises of extinction challenging the assumption that poverty and suffering are definitive indicators of such crises Instead it presents cultural extinction as a gradual process stemming from a culture's failure to adapt to its changing environment The book considers how injustice economic misalignment and systemic inequalities such as unnecessary poverty illness and religious discrimination contribute to cultural collapse When these injustices become ingrained within a society's institutions the eventual disappearance of the culture becomes inevitable unless transformative change is initiated *Information and Communication Technologies in Tourism 1999* Dimitrios Buhalis, Walter Schertler, 2012-12-06 During the last couple of years we learned that information and communication technologies have to be seen as key factors for the success in various industries Especially in tourism it became evident that missing the developments in this sector could not only be fatal for the unfolding of the businesses but also unrenouncable in order to withstand in competition The objective of ENTER is to show the chance that information technology offers for all participants in the touristic competition to act successfully in permanently changing information environments It reflects the important role of information technologies in this field Within the last six years ENTER united various experts practitioners as well as researchers to exchange their experiences ideas and visions in the sector of tourism and information technology The conference's scope is to provide an international platform to discuss the topical situation and future trends and the possibilities to shape the own strategies The various points of view of all the participants in workshops reports and discussions always lead to most interesting perceptions Nature's Holism Laurence Evans, 1999-08 In the association of the bee and the flower is a very advanced reflection of the process of evolution through natural selection Nature's Holism explores the coevolution of long associated species arriving at a holistic view of nature where the compatibility between species is significant In nature there are two interacting forces There is the

numerical increase in numbers of a species termed a force of perpetuity Increasing numbers of a single species have an inevitable impact on the environment However as each species survives within an ecological context there is a feedback from the ecosystem as numbers increase requiring a necessary compatibility with the ecosystem Fitness is therefore defined not only by quantitative representation of genes in the next generation perpetuity but also the qualitative condition of compatibility with the habitat or ecosystem that provided the conditions and resources for this success
