The Human Time Bomb:

The Human Time Bomb Nick Carter, 1969 **Timebomb** Giles Merritt, 2025-05-27 Ageing is a timebomb We celebrate our greater longevity yet few of us consider its consequences This book is an important warning that unless Europeans defuse its explosive force within two decades our societies will be devastated by it The hard fact is that because our political economies have been built around shorter lifespans they risk being blown apart by ageing The pressures exerted by the over 60s who are increasing from today's quarter of the population to a third will upend our politics and impoverish our young Millennials and Gen Zers are already saddled with their elders runaway pension and healthcare costs but are themselves poorer and less privileged Merritt a veteran analyst of the European scene traces the demographic projections that politicians of all persuasions have long ignored and shines a harsh light on policy shortcomings that must be urgently addressed For anyone wants a stake in our future this book is essential reading which clarifies the political choices to be made if comparatively prosperous Europe isn't to die of old age **Human Chorionic Gonadotropin (hCG)** Laurence A. Cole, 2014-12-02 Human chorionic gonadotropin hCG is produced during pregnancy by the embryo It promotes progesterone production by corpus luteal cells It also functions in pregnancy to promote angiogenesis in uterine vasculature it immunoblands the invading placental tissue so it is not rejected by the maternal uterine tissues promotes the growth of the uterus in line with the growth of the fetus promotes the differentiation of growing cytotrophoblast cells promotes the quiescence of contractions in the uterine myometrium during the course of pregnancy and also has function in growth and development of fetal organs The first edition described the detailed biology clinical chemistry and clinical perspectives of hCG and associated molecules and examines hCG hyperglycosylated hCG and hCG free subunit 3 separate and independent molecules with totally sovereign physiological functions The second edition will include coverage of the many new discoveries that have been made in the last five years hCG analogues may be the actual driving signal of all human cancers The editor estimates that 40% of the out of date material will be excluded and replaced with 40% of the exciting new findings The book will also have a much clearer pregnancy and cancer focus It provides comprehensive information on hCG from basic science to clinical medicine The second edition will include coverage of the many new discoveries that have been made in the last five years Updated material with new findings in the field *The human time-bomb* Nick Carter, 1972 *The Human Cosmos* Jo Marchant, 2021-09-07 A Best Book of 2020 NPR A Best Book of 2020 The Economist A Top Ten Best Science Book of 2020 Smithsonian A Best Science and Technology Book of 2020 Library Journal A Must Read Book to Escape the Chaos of 2020 Newsweek Starred review Booklist Starred review Publishers Weekly A historically unprecedented disconnect between humanity and the heavens has opened Jo Marchant's book can begin to heal it For at least 20 000 years we have led not just an earthly existence but a cosmic one Celestial cycles drove every aspect of our daily lives Our innate relationship with the stars shaped who we are our art religious beliefs social status scientific advances and even our biology But over the last few

centuries we have separated ourselves from the universe that surrounds us It s a disconnect with a dire cost Our relationship to the stars and planets has moved from one of awe wonder and superstition to one where technology is king the cosmos is now explored through data on our screens not by the naked eye observing the natural world Indeed in most countries modern light pollution obscures much of the night sky from view Jo Marchant s spellbinding parade of the ways different cultures celebrated the majesty and mysteries of the night sky is a journey to the most awe inspiring view you can ever see looking up on a clear dark night That experience and the thoughts it has engendered have radically shaped human civilization across millennia The cosmos is the source of our greatest creativity in art in science in life To show us how Jo Marchant takes us to the Hall of the Bulls in the caves at Lascaux in France and to the summer solstice at a 5 000 year old tomb at Newgrange Ireland We discover Chumash cosmology and visit medieval monks grappling with the nature of time and Tahitian sailors navigating by the stars We discover how light reveals the chemical composition of the sun and we are with Einstein as he works out that space and time are one and the same A four billion year old meteor inspires a search for extraterrestrial life The cosmically liberating summary revelation is that star gazing made us human **The Human City** Joel

Kotkin,2016-04-12 The author of The Coming of Neo Feudalism and The New Class Conflict challenges conventions of urban planning Around the globe most new urban development has adhered to similar tenets tall structures small units and high density In The Human City Joel Kotkin called America s uber geographer by David Brooks of the New York Times questions these nearly ubiquitous practices suggesting that they do not consider the needs and desires of the vast majority of people Built environments Kotkin argues must reflect the preferences of most people even if that means lower density development The Human City ponders the purpose of the city and investigates the factors that drive most urban development today Armed with his own astute research a deep seated knowledge of urban history and a sound grasp of economic political and social trends Kotkin pokes holes in what he calls the retro urbanist ideology and offers a refreshing case for dispersion centered on human values This book is not anti urban but it does advocate a greater range of options for people to live the way they want at all stages of their lives Praise for The Human City Kotkin presents the most cogent evidence based and clear headed exposition of the pro suburban argument In pithy readable sections each addressing a single issue he debunks one attack on the suburbs after another But he does more than that He weaves an impressive array of original observations about cities into his arguments enriching our understanding of what cities are about and what they can and must become Shlomo Angel Wall Street Journal The most eloquent expression of urbanism since Jane Jacobs s The Death and Life of Great American Cities Kotkin writes with a strong sense of place he recognizes that the geography and traditions of a city create the contours of its urbanity Ronnie Wachter Chicago Tribune **Torture** Donatella Di Cesare,2018-10-22 Torture is not as universally condemned as it once was From Guant namo and Abu Ghraib prisons to the death of Giulio Regeni countless recent cases have shocked public opinion But if we want to defend the human dignity that torture violates simple indignation is not

enough In this important book Donatella Di Cesare provides a critical perspective on torture in all its dimensions She seeks to capture the peculiarity of an extreme and methodical violence where the tormentor calculates and measures out pain so that he can hold off the victim's death allowing him to continue to exercise his sovereign power For the victim being tortured is like experiencing his own death while he is still alive Torture is a threat wherever the defenceless find themselves in the hands of the strong in prisons in migrant camps in nursing homes in centres for the disabled and in institutions for minors This impassioned book will appeal to students and scholars of philosophy and political theory as well as to anyone committed to defending human rights as universal and inviolable

Digital Interfacing Daniel Black, 2018-10-26 This book takes the interface or rather to interface a process rather than a discrete object or location as a concept emblematic of our contemporary embodied relationship with technological artefacts The fundamental question addressed by this book is How can we understand what it means to perceive or act upon the world as a body artefact assemblage Black works to clarify the role of artefacts of all kinds in human perception and action then considers the ways in which new digital technologies can expand and transform this capacity to change our mode of engagement with our environment Throughout the discussion is grounded in specific technologies some already familiar and some still in development e g new virtual reality and brain machine interface technologies natural user interfaces etc In order to develop a detailed generalizable theory of how we interface with technology Black assembles an analytical toolkit from a number of different disciplines including media theory ethology clinical psychology cultural theory philosophy science and technology studies cultural history aesthetics and neuroscience
