Six Scottish Burghs Andy MacMillan, 1992      *The Burghs and Parliament in Scotland, c. 1550-1651* Alan R. MacDonald, 2016-03-16 Existing studies of early modern Scotland tend to focus on the crown the nobility and the church Yet from the sixteenth century a unique national representative assembly of the towns the Convention of Burghs provides an insight into the activities of another key group in society Meeting at least once a year the Convention consisted of representatives from every parliamentary burgh and was responsible for apportioning taxation settling disputes between members regulating weights and measures negotiating with the crown on issues of concern to the merchant community The Convention's role in relation to parliament was particularly significant for it regulated urban representation admitted new burghs to parliament and co-ordinated and oversaw the conduct of the burghs estate in parliament In this the first full length study of the burghs and parliament in Scotland the influence of this institution is fully analysed over a one hundred year period Drawing extensively on local and national sources this book sheds new light upon the way in which parliament acted as a point of contact a place where legislative business was done relationships formed and status affirmed The interactions between centre and localities and between urban and rural elites are prominent themes as is Edinburgh's position as the leading burgh and the host of parliament The study builds upon existing scholarship to place Scotland within the wider British and European context and argues that the Scottish parliament was a distinctive and effective institution which was responsive to the needs of the burghs both collectively and individually      *The Legal Language of Scottish Burghs* Joanna Kopaczyk, 2013-07-16 This book offers an innovative corpus driven approach to historical legal discourse It is the first monograph to examine textual standardization patterns in legal and administrative texts on the basis of lexical bundles drawing on a comprehensive corpus of medieval and early modern legal texts The book's focus is on legal language in Scotland where law with its own nomenclature and its own repertoire of discourse features was shaped and marked by the concomitant standardizing of the vernacular language Scots a sister language to the English of the day Joanna Kopaczyk's study is based on a unique combination of two methodological frameworks a rigorous corpus driven data analysis and a pragmaphilological context sensitive qualitative interpretation of the findings Providing the reader with a rich socio-historical background of legal discourse in medieval and early modern Scottish burghs Kopaczyk traces the links between orality community and law which are reflected in discourse features and linguistic standardization of legal and administrative texts In this context the book also revisits important ingredients of legal language such as binomials or performatives Kopaczyk's study is grounded in the functional approach to language and pays particular attention to referential interpersonal and textual functions of lexical bundles in the texts It also establishes a connection between the structure and function of the recurrent patterns and paves the way for the employment of new methodologies in historical discourse analysis      **History of the Burgh and Parish Schools of Scotland** James Grant, 1876      **Constitution of the Royal Burghs of Scotland,**
