Small Mammal Fossils from the Barstow Formation, California Everett H. Lindsay, 1972      **Biostratigraphy and Vertebrate Paleontology of the San Timoteo Badlands, Southern California** L. Barry Albright III, 2000-03-08 The author describes forty two fossil taxa recovered during a study of the San Timoteo Badlands that used magnetobiostratigraphy to develop a temporal framework for addressing the tectonic evolution of southern California over the last 6 million years For the Pliocene small mammals are an effective means of correlating a magnetostratigraphy to the Geomagnetic Polarity Time Scale when radioisotopic dates are unobtainable      Small Mammal Fossils and Correlation of Continental Deposits, Safford and Duncan Basins, Arizona, USA Yukimitsu Tomida, 1987      **Mojave Desert** , 1994

Evolutionary History of Bats Gregg F. Gunnell, Nancy B. Simmons, 2012-03-29 This book explores the rich evolutionary history of bats from multiple perspectives presenting some of the most remarkable discoveries involving fossil bats      **Late Cretaceous and Cenozoic Mammals of North America** Michael O. Woodburne, 2004 This book places into modern context the information by which North American mammalian paleontologists recognize divide calibrate and discuss intervals of mammalian evolution known as North American Land Mammal Ages It incorporates new information on the systematic biology of the fossil record and utilizes the many recent advances in geochronologic methods and their results The book describes the increasingly highly resolved stratigraphy into which all available temporally significant data and applications are integrated Extensive temporal coverage includes the Lancia part of the Late Cretaceous and geographical coverage includes information from Mexico an integral part of the North American fauna past and present      *Stratigraphic Notes, 1980-1982* J. Alan Bartow, J. M. Hoare, Ogden Tweto, Ronald Carl Johnson, Tor Helge Nilsen, William Jasper Sando, Bernard L. Mamet, Gardner M. Pittman, Kristin A. McDougall, T. E. Moore, W. L. Coonrad, Scott McCoy, 1983      *Cenozoic Stratigraphy of the Transverse Ranges and Adjacent Areas, Southern California* Michael O. Woodburne, 1975      **Bibliography of Fossil**

**Vertebrates, 1969-1972** , 1973      **The Tertiary Record of Rodents in North America** William W. Korth, 2013-11-21 Nearly half of the known species of mammals alive today more than 1600 are rodents or gnawing mammals Nowak and Paradiso 1983 The diversity of rodents is greater than that of any other order of mammals Thus it is not surprising that the fossil record of this order is extensive and fossil material of rodents from the Tertiary is known from all continents except Antarctica and Australia The purpose of this book is to compile the published knowledge on fossil rodents from North America and present it in a way that is accessible to paleontologists and mammalogists interested in evolutionary studies of rodents The literature on fossil rodents is widely scattered between journals on paleontology and mammalogy and in house publications of museums and universities Currently there is no single source that offers ready access to the literature on a specific family of rodents and its fossil history This work is presented as a reference text that can be useful to specialists in rodents fossil or recent as well as mammalian paleontologists working on whole faunas Because the diversity of rodents in

the world is essentially limitless any monograph that included all fossil rodents would similarly be limitless Hence this book is limited to the record of Tertiary rodents of North America The several species of South American caviomorph rodents that invaded North America near the end of the Tertiary are also not included in this text *Vertebrate Paleontology in New Mexico* Spencer G. Lucas, Robert M. Sullivan, *Management Plan for the Rainbow Basin Natural Area*, 1991 *Geological Survey Bulletin*, 1982 **Beaver in Western North America** Dean E. Medin, Kathryn E. Torquemada, 1988 **Regional Geology of Mount Diablo, California** Raymond Sullivan, Doris Sloan, Jeffrey R. Unruh, David P. Schwartz, 2021 Mount Diablo and the geology of the Central California Coast Ranges are the subject of a volume celebrating the Northern California Geological Society's 75th anniversary The breadth of research illustrates the complex Mesozoic to Cenozoic tectonic evolution of the plate boundary *Bibliography of Fossil Vertebrates, 1964-1968* Charles Lewis Camp, 1972

*Ecosystems of California* Harold Mooney, Erika Zavaleta, 2016-01-19 This long anticipated reference and sourcebook for California's remarkable ecological abundance provides an integrated assessment of each major ecosystem type its distribution structure function and management A comprehensive synthesis of our knowledge about this biologically diverse state *Ecosystems of California* covers the state from oceans to mountaintops using multiple lenses past and present flora and fauna aquatic and terrestrial natural and managed Each chapter evaluates natural processes for a specific ecosystem describes drivers of change and discusses how that ecosystem may be altered in the future This book also explores the drivers of California's ecological patterns and the history of the state's various ecosystems outlining how the challenges of climate change and invasive species and opportunities for regulation and stewardship could potentially affect the state's ecosystems The text explicitly incorporates both human impacts and conservation and restoration efforts and shows how ecosystems support human well being Edited by two esteemed ecosystem ecologists and with overviews by leading experts on each ecosystem this definitive work will be indispensable for natural resource management and conservation professionals as well as for undergraduate or graduate students of California's environment and curious naturalists

**Neogene Mammals** Spencer G. Lucas, Gary S. Morgan, Justin A. Spielmann, Donald R. Prothero, 2008 *Neogene Mammals* New Mexico Museum of Natural History and Science Bulletin 44 **Contributions to Geology**, 1991 **Inland Southern California, the Last 70 Million Years** Michael O. Woodburne, Robert E. Reynolds, David P. Whistler, 1991
