Boudewijn de Bruin

The Fragmentation Of Reason Preface To A Pragmatic Theory Of Cognitive Evaluation:

The Fragmentation of Reason Stephen P. Stich, 1993 Stephen Stich undertakes a spirited defense of commonsense reasoning and puts forth a critique of those writers who argue that widespread irrationality is a biological or conceptual impossibility

The Fragmentation of Reason Stephen P. Stich, 1990 *The Business of Liberty* Boudewijn de Bruin, 2022 What makes freedom valuable to us Through an interdisciplinary lens this book gives an original account of the relationship between freedom and knowledge and offers new perspectives on debates surrounding privacy corporate culture consumer protection freedom of speech and more

Believable Evidence Veli Mitova, 2017-05-25 Believable Evidence argues that evidence consists of true beliefs This claim opens up an entirely overlooked space on the ontology of evidence map between purely factualist positions such as those of Williamson and Dancy and purely psychologist ones such as that of Conee and Feldman Veli Mitova provides a compelling three level defence of this view in the first contemporary monograph entirely devoted to the ontology of evidence First once we see the evidence as a good reason metaethical considerations show that the evidence must be psychological and veridical Second true belief in particular allows epistemologists to have everything they want from the concept of evidence Finally the view helps us locate the source of the normative authority of evidence The book challenges a broad range of current views on the ontology of reasons and their normative authority making it a must read for scholars and advanced students in metaethics and epistemology

The Palgrave Encyclopedia of Interest Groups, Lobbying and Public Affairs Phil Harris, Alberto Bitonti, Craig S. Fleisher, Anne Skorkjær Binderkrantz, 2022-06-20 The growing need for a concise and comprehensive overview of the world of interest groups lobbying and public affairs called for a compendium of existing research key theories concepts and case studies This project is the first transnational encyclopedia to offer such an interdisciplinary and wide overview of these topics including perspectives on public relations crisis management communication studies as well as political science political marketing and policy studies It is an interdisciplinary work which involved an extraordinary pool of contributors made up of leading scholars and practitioners from all around the globe it is a live and evolving project focused on drawing together grounded international knowledge for our diverse and developing world The 200 entries of the Palgrave Encyclopedia of Interest Groups Lobbying and Public Affairs to be found as a live reference work online here and in two print volumes in 2022 address these research avenues tackling a growing demand for a comprehensive international reference work regarding key global sectors and policymaking structures looking beyond the traditional markets of Europe and North America to incorporate practice and research from Asia Africa Oceania and Latin America This encyclopedia acts as a synthesis of existing research and aims to aid academics students and practitioners navigate their relevant fields around the globe

Feelings of Believing Ryan Hickerson, 2020-02-28 In *Feelings of Believing* Psychology History Phenomenology Ryan Hickerson demonstrates that philosophers as diverse as Hume Descartes Husserl and William James all treated believing as feeling He

argues that doxastic sentimentalism therefore is considerably more central to modern epistemology than philosophers have recognized When the empirical psychology of overconfidence and attention is brought to bear on the history of philosophy and the phenomenology of believing all point toward belief as fundamentally affective Understanding believing as feeling has the potential to make us better believers both by encouraging suspicion of unexamined certainties and by focusing attention on credulity Hickerson argues that believing is typically felt but not given attention by the believer and he suggests that virtuous believers are those who pay careful attention to their own sentiments who attempt to raise their beliefs to the level of judgments

The Cambridge Companion to Hume David Fate Norton, Jacqueline Taylor, 2008-12-08 Although best known for his contributions to the theory of knowledge metaphysics and philosophy of religion Hume also influenced developments in the philosophy of mind psychology ethics political and economic theory political and social history and aesthetic theory The fifteen essays in this volume address all aspects of Hume's thought The picture of him that emerges is that of a thinker who though often critical to the point of scepticism was nonetheless able to build on that scepticism a constructive viable and profoundly important view of the world Also included in this volume are Hume's two brief autobiographies and a bibliography suited to those beginning their study of Hume This second edition of one of our most popular Companions includes six new essays and a new introduction and the remaining essays have all been updated or revised

The Musical Representation Charles O. Nussbaum, 2007 How human musical experience emerges from the audition of organized tones is a riddle of long standing In *The Musical Representation* Charles Nussbaum offers a philosophical naturalist's solution Nussbaum founds his naturalistic theory of musical representation on the collusion between the physics of sound and the organization of the human mind brain He argues that important varieties of experience afforded by Western tonal art music since 1650 arise through the feeling of tone the sense of movement in musical space cognition emotional arousal and the engagement by way of specific emotional responses of deeply rooted human ideals Construing the art music of the modern West as representational as a symbolic system that carries extramusical content Nussbaum attempts to make normative principles of musical representation explicit and bring them into reflective equilibrium with the intuitions of competent listeners Nussbaum identifies three modes of musical representation describes the basis of extramusical meaning and analyzes musical works as created historical entities performances of which are tokens or replicas In addition he explains how music gives rise to emotions and evokes states of mind that are religious in character Nussbaum's argument proceeds from biology psychology and philosophy to music and occasionally from music back to biology psychology and philosophy The human mind brain writes Nussbaum is a living record of its evolutionary history relatively recent cognitive acquisitions derive from older representational functions of which we are hardly aware Consideration of musical art can help bring to light the more ancient cognitive functions that underlie modern human cognition The biology psychology and philosophy of musical representation he argues have something to tell us about what

we are based on what we have been **Commonsense Darwinism** John Lemos,2015-11-09 Written in a simple accessible style Commonsense Darwinism offers a clear critical examination of the subject Assuming that the diversity of life including human beings is the result of evolution from common origins and that its driving force is natural selection the book explores what this might mean for issues in ethics philosophy of religion epistemology and metaphysics The author s defense of free will makes this an especially stimulating read **The Blackwell Companion to Philosophy** Nicholas Bunnin,Eric Tsui-James,2008-04-15 This fully revised and updated edition of Nicholas Bunnin and E P Tsui James popular introductory philosophy textbook brings together specially commissioned chapters from a prestigious team of scholars writing on each of the key areas figures and movements in philosophy
