

Frequencies

*Wave particle duality harmonic,
electromagnetic mean ratio subsonic.
Cohorts gravity gleaming in purple gold,
light forces and its tenacious sensuous fold.
Purring cat in transcendent stage on my chest,
the eyes of the sleeper gently suggest.
Heart by knowledge heaved now in still,
spheres of the free flowing will.
Your smiling eyes in mental frame,
changing perception never anymore the same.
Memories in subtle dance unconfined,
desires in simple pleasures all sleep denied.
To chase the glowing hours with every nuance,
sensing woven dreams by reason outrance.
Lingering like the perfect day lone night,
stimulated images is the love story all right.
The unbodied joy and its spiral fire,
like forming galaxies and its spectrum to admire.
By brilliant dark white dawn clear,
hardly to see but feeling it is there.
Frequencies the sustaining earth and air,
morning rains out its beams leaving no one spare.
Presence as conducting vibrating molecule,
freewill and loving soul choice secret hour to renew.*

their connotative symbolic meanings which form the basis for what have been called colour metaphors. They also provide a rich database of these associations which will be of use to researchers who may be interested in the use of colour terms in other texts whether literary or non literary. This book will be of interest primarily to academics and advanced students in the field of linguistic stylistics.

The Evolution of Verse Structure in Old and Middle English Poetry Geoffrey Russom, 2017-04-07

In this fascinating study Geoffrey Russom traces the evolution of the major English poetic traditions by reference to the evolution of the English language and considers how verse forms are born how they evolve and why they die. Using a general theory of poetic form employing universal principles rooted in the human language faculty Russom argues that certain kinds of poetry tend to arise spontaneously in languages with identifiable characteristics. Language changes may require modification of metrical rules and may eventually lead to extinction of a meter. Russom's theory is applied to explain the development of English meters from the earliest alliterative poems in Old and Middle English and the transition to iambic meter in the Modern English period. This thorough yet accessible study provides detailed analyses of form in key poems including *Beowulf* and *Sir Gawain and the Green Knight* and a glossary of technical terms.

Intertextuality in Flavian Epic Poetry Neil Coffee, Chris Forstall, Lavinia Galli Milic, Damien Nelis, 2019-12-16

This collection of essays reaffirms the central importance of adopting an intertextual approach to the study of Flavian epic poetry and shows despite all that has been achieved just how much still remains to be done on the topic. Most of the contributions are written by scholars who have already made major contributions to the field and taken together they offer a set of state of the art contributions on individual topics a general survey of trends in recent scholarship and a vision of at least some of the paths work is likely to follow in the years ahead. In addition there is a particular focus on recent developments in digital search techniques and the influence they are likely to have on all future work in the study of the fundamentally intertextual nature of Latin poetry and on the writing of literary history more generally.
