The Future Of Air Power In The Aftermath Of The Gulf War:

The Future of Air Power in the Aftermath of the Gulf War Robert L. Pfaltzgraff, Richard H. Shultz, 1992 This collection of essays reflects the proceedings of a 1991 conference on The United States Air Force Aerospace Challenges and Missions in the 1990s sponsored by the USAF and Tufts University The 20 contributors comment on the pivotal role of airpower in the war with Iraq and address issues and choices facing the USAF such as the factors that are reshaping strategies and missions the future role and structure of airpower as an element of US power projection and the aerospace industry's views on what the Air Force of the future will set as its acquisition priorities and strategies The authors agree that aerospace forces will be an essential and formidable tool in US security policies into the next century The contributors include academics high level military leaders government officials journalists and top executives from aerospace and defense contractors The Future of Air Power in the Aftermath of the Gulf War, 1992 Air University is proud to have joined the Air Staff and the International Security Studies Program of the Fletcher School of Law and Diplomacy at Tufts University in sponsoring the April 1991 conference on aerospace challenges and missions that produced this collection of essays Written by a distinguished group of specialists from academia the military government business and the media these essays examine American national security policy and Air Force issues from a variety of perspectives Aside from their remarkable perceptiveness the contributions of the authors are especially timely because they address the pivotal role of air power in the war with Iraq The essays leave no doubt that the employment of both established and innovative methods of air combat in that crisis has important implications for the global security environment of the future In that sense this book provides a foundation for evaluating the complex policy challenges that we face in the 1990s and into the next century John Warden and the Renaissance of American Air Power John Andreas Olsen, 2007 Dr John Andreas Olsen has written an insightful compelling biography of retired U S Air Force colonel John A Warden III the brilliant but controversial air warfare theorist and architect of Operation Desert Storm's air campaign Warden's radical ideas about air power's purposes and applications promulgated at the expense of his own career sparked the ongoing revolution in military affairs Legendary in defense circles Warden is also the author of *The Air Campaign Planning for Combat* republished by Brassey's Inc in 1989 Presenting both the positives and negatives of Warden's personality and impact in this objective portrait Olsen offers a trenchant analysis of his revolutionary ideas and great accomplishments **Strategic Warfare in Cyberspace** Gregory J. Rattray, 2001 A comprehensive analysis of strategic information warfare waged via digital means as a distinct concern for the United States and its allies In the information age information systems may serve as both weapons and targets Although the media has paid a good deal of attention to information warfare most treatments so far are overly broad and without analytical foundations In this book Gregory Rattray offers a comprehensive analysis of strategic information warfare waged via digital means as a distinct concern for the United States and its allies Rattray begins by analyzing salient features of information infrastructures and distinguishing strategic

information warfare from other types of information based competition such as financial crime and economic espionage He then establishes a conceptual framework for the successful conduct of strategic warfare in general and of strategic information warfare in particular Taking a historical perspective he examines U S efforts to develop air bombardment capabilities in the period between World Wars I and II and compares them to U S efforts in the 1990s to develop the capability to conduct strategic information warfare He concludes with recommendations for strengthening U S strategic information warfare defenses

Strategic Air Power in Desert Storm John Andreas Olsen, 2013-11-05 In response to the Iraqi invasion of Kuwait on the second of August 1990 a small group of air power advocates in the Pentagon proposed a strategic air campaign Operation Desert Storm designed to drive the Iraqi army from Kuwait by a sustained effort against the major sources of Iraqi national power John Andreas Olsen provides a coherent and comprehensive examination of the origins evolution and implementation of this campaign His findings derive from official military and political documentation interviews with United States Air Force officers who were closely involved with the planning of the campaign and Iraqis with detailed knowledge and experience of the inner workings of the Iraqi regime

Airmen and air theory a review of the sources Phillip S. Meilinger, 2001 This part of the book reviews the state of American airpower biography and autobiography I have set certain parameters to define the boundaries of my discussion I discuss biographies and autobiographies anthologies and oral histories of military officers who served in senior positions Thus although the stories of great aviators like Eddie Rickenbacker Charles Lindbergh and Chuck Yeager are important those men did not command large forces either in combat or in peace they had only a temporary effect on the development of strategy and doctrine Similarly excluded are civilian political leaders and industrialists like Stuart Symington and Donald Douglas even though they played key roles In their own spheres What follows are the stories some published some not of America s greatest military airmen some told by themselves others by biographers The order of presentation is roughly chronological according to the time during which these men served The fact that a surprising number of air luminaries do not appear here means that much work remains to be done

Grounded Robert M. Farley, 2014-03-11 The United States needs airpower but does it need an air force In *Grounded* Robert M Farley persuasively argues that America should end the independence of the United States Air Force USAF and divide its assets and missions between the United States Army and the United States Navy In the wake of World War I advocates of the Air Force argued that an organizationally independent air force would render other military branches obsolete These boosters promised clean easy wars airpower would destroy cities beyond the reach of the armies and would sink navies before they could reach the coast However as Farley demonstrates independent air forces failed to deliver on these promises in World War II the Korean War

the Vietnam War the first Gulf War the Kosovo conflict and the War on Terror They have also had perverse effects on foreign and security policy as politicians have been tempted by the vision of devastating airpower to initiate otherwise ill considered conflicts The existence of the USAF also produces turf wars with the Navy and the Army leading to redundant expenditures nonsensical restrictions on equipment use and bad tactical decisions Farley does not challenge the idea that aircraft represent a critical component of America s defenses nor does he dispute that especially now with the introduction of unmanned aerial vehicles airpower is necessary to modern warfare Rather he demonstrates that the efficient and wise use of airpower does not require the USAF as presently constituted An intriguing scholarly polemic Grounded employs a wide variety of primary and secondary source materials to build its case that the United States should now correct its 1947 mistake of having created an independent air force

Plotting a True Course William P. Head, 2003-05-30 Examining wars from the allied victory in World War II to the conflict in Viet Nam and finally to the operations in the Gulf and Kosovo this book presents a comprehensive look at the evolution of strategic air attack theory and doctrine over the years
