The Historian And The Climate Of Opinion:

The Historian and the Climate of Opinion Robert Allen Skotheim, 2018-10-24 This volume of writings by outstanding twentieth century American historians presents one aspect of the problem which results from the conflict between the subjectivity of the historian and the objectivity of the past It examines in particular the relationship between the historian and the climate of opinion in which he does he work

The Historian and the Climate of Opinion Robert Allen Skotheim, 1969 *The Historian and the Climate of Opinion* Robert Allen Skotheim, 1969 American Historical Explanations Gene Wise, 1980 American Historical Explanations was first published in 1980 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions In this new edition of American Historical Explanations Gene Wise expands his examination of historical thinking to include the latest work in American Studies the new social history ethnography and psychohistory Wise asserts that historians address their subjects through an intervening set of assumptions or what he calls explanation forms similar to the philosophical paradigms that Thomas Kuhn has found in scientific inquiry Through analysis of historical cultural texts including the work of V L Parrington Lionel Trilling and Perry Miller he defines the forms used by several groups of American historians and traces the process by which an old form breaks down and is replaced by a new set of assumptions Throughout he aims to study the process of change in the history of ideas His conclusions extend beyond historiography and will be useful for those interested in literature social sciences and the arts Routledge Library Editions: Historiography Various, 2021-06-23 The greatest problem in historical scholarship theoretically and practically is the relation between historians and their subject matter The past is gone and historians can only study its remnants On what basis do scholars select certain facts from the mass of data left from the past How do they explain the interrelationship of the facts they select What criteria do they use to evaluate their subject The 35 volumes in this set originally published between 1926 and 1990 discuss and answer these essential questions faced by historians The development of historical understanding during the 18th and 19th centuries was one of the most striking features of Western culture Both historiography and historical thinking advanced as never before The historical movement of the 19th century was perhaps second only to the scientific revolution of the seventeenth century in transforming Western thought One consequence was extensive organisation and professionalization of research which the volumes in this set reflect The Study of History, 1988 The chief objective of this text is to provide a handy reference guide for teachers students and researchers of modern European economic and social history Since the bibliography covers only works written in the English language it will probably be of less use to the last named group at least insofar as those within it are already seasoned researchers on a particular country or topic However it would have been quite impossible from the point of view of length to have included all the literature in foreign languages while to have done so would have defeated the essential aim of the volume namely that of providing a

reasonably convenient guide for those who teach and study the subject but who are not primarily specialists in the field

The Writing of American History Michael Kraus, Davis D. Joyce, 1990-01-01 Events which become historical says Michael Kraus do not live on because of their mere occurrence They survive when writers re create them and thus preserve for posterity their otherwise fleeting existence Paul Revere s ride for example might well have vanished from the records had not Longfellow snatched it from approaching oblivion and given it a dramatic spot in American history Now Revere rides on in spirited passages in our history books In this way the recorder of events becomes almost as important as the events themselves In other words historiography the study of historians and their particular contributions to the body of historical records must not be ignored by those who seriously wish to understand the past When the first edition of Michael Kraus s Writing of American History was published a reviewer for the New York Herald Tribune wrote No serious study of our national origins and development can afford not to have such an aid as this at his elbow The book quickly came to be regarded as one of the few truly standard general surveys of American historiography invaluable as a reference book as a textbook and as a highly readable source of information for the interested general reader This new edition with coauthor Davis D Joyce confirms its position as the definitive work in the field Concise yet comprehensive here is an analysis of the writers and writings of American history from the Norse voyages to modern times The book has its roots in Kraus s pioneering History of American History published in 1937 a unique and successful attempt to cover in one volume the entire sweep of American historical activity Kraus revised and updated the book in 1953 when it was published under the present title Now once again the demand for its revision has been met Davis D Joyce with the full cooperation and approval of Kraus has thoroughly revised and brought up to date the text of the 1953 edition The clarity and evenhandedness of Kraus s text has been carefully preserved The last three chapters add entirely new material surveying the massive and complex body of American historical writing since World War II Consensus American Historical Writing in the 1950s Conflict American Historical Writing in the 1960s and Complexity American Historical Writing in the 1970s and Beyond Michael Kraus Professor Emeritus at City College of New York received the Ph D from Columbia University and in his long career established himself as one of America s foremost historiographers Davis D Joyce is Professor Emeritus of History East Central University Ada Oklahoma and is the author of HOWARD ZINN A RADICAL AMERICAN VISION and ALTERNATIVE OKLAHOMA CONTRARIAN VIEWS OF THE SOONER STATE He teaches part time at Rogers State University Claremore Oklahoma

Trust in an Age of Arrogance C FitzSimons

Allison,2011-05-26 God is in the dock Shall we convict him or forgive him Shall we replace the God of Scripture with another of our choosing mock and deride him or ignore him Shall we replace revelation with the chaos of speculation We perceive ourselves rather than God as the center of the world and this universal condition leads to conflict with others and with God Maintaining our center causes cheating lying litigation divorce wars genocide and human misery Western civilization is giving up trust in the promise of God's mercy justice and forgiveness and replacing it with trust in the goodness of man Jesus warned us to beware the teaching of the Sadducees and Pharisees The Sadducees who denied hope of eternal life are a rough equivalent of our modern day secularists with their religious trust that this world is all there is Replacing God with trust in flawed human nature is a mark of arrogance that even pagans would have characterized as hubris evoking divine wrath The Pharisee's yeast of self-righteousness is a natural condition of us all Even when cleansed it reappears in every tradition rendering forgiveness and transformation a promise only for those who think they have earned and deserve it Such a distortion of God's word is congenial to our self as center but it robs us sinners of the justice and mercy of a loving God Following Jesus's warning we have the opportunity to wipe away the Sadducee arrogance and the Pharisee self-righteousness and discover anew the supreme power and joy of the Christian faith Practicing Linguistic Historiography E.
