Collins, Joan Thirsk, 2000 The unifying theme of this volume is the changing role of the countryside in national life and the impact upon it of the social and economic forces unleashed by industrialisation and the growth of towns The Making of Indian Secularism N. Chatterjee, 2011-01-26 A unique study of how a deeply religious country like India acquired the laws and policies of a secular state highlighting the contradictory effects of British imperial policies the complex role played by Indian Christians and how this highly divided community shaped its own identity and debated that of their new nation **The Standard Cyclopedia of Modern Agriculture and Rural Economy**, 1914

Large paper ed** Francis Adams Hyett, 1896 *The Practice of British Geology, 1750-1850* Hugh Torrens, 2024-10-28 Geology is the most historical of all sciences Yet its own history remains neglected especially the many aspects of how geology was practised in the past This volume analyses the careers of some important practical figures in English Welsh Scottish and Irish geology between 1750 and 1850 These include people who would have regarded themselves more as mining engineers or coal viewers as they were then called in the vital coal industry or mineral surveyors as today's mineral prospectors were first called from 1808 or even inventors Their expertise in the land which led the industrial revolution took them all over the world Those included here went to Italy and South Peru and North America Virginia and Canada The practice of geology through the search for mines and minerals has been much less attended to by historians than the geology which was undertaken by leisured amateurs even though practical geology was as important in the past as the oil industry is today *The Enclosure of Knowledge* James D. Fisher, 2022-07-21 The rise of agrarian capitalism in Britain is usually told as a story about markets land and wages The Enclosure of Knowledge reveals that it was also about books knowledge and expertise It argues that during the early modern period farming books were a key tool in the appropriation of the traditional art of husbandry possessed by farm workers of all kinds It challenges the dominant narrative of an agricultural enlightenment in which books merely spread useful knowledge by showing how codified knowledge was used to assert greater managerial control over land and labour The proliferation of printed books helped divide mental and manual labour to facilitate emerging social divisions between labourers managers and landowners The cumulative effect was the slow enclosure of customary knowledge By synthesising diverse theoretical insights this study opens up a new social history of agricultural knowledge and reinvigorates long term histories of knowledge under capitalism
