The quadratic rooms. Elementary theory of the distribution of prime numbers Filippo Giordano,2017-12-14 Versione inglese contenente una parte dei capitoli dell'opera Le stanze quadratiche Il pi antico enigma sui numeri naturali riguarda il mistero della formazione dei numeri primi Questo studio ne risolve il mistero con l'introspezione dei numeri naturali mettendo in risalto un particolare tipo di loro divisori definiti Mm i quali sono caratteristica

costante degli intervalli numerici orbitanti attorno ai numeri quadrati Tali intervalli che costituiscono i vari Insiemi Ima e Imb facilmente identificabili nella scala dei numeri naturali sono sempre pi grandi e contengono sempre pi numeri primi Corredato da molteplici tabelle esplicative lo studio evidenzia anche delle formule matematiche che consentono di individuare mediante i loro divisori le postazioni dei numeri composti all interno di tali intervalli Inoltre mette in evidenza la straordinaria concomitanza di elementi degli insiemi IMA e IMB coi raggruppamenti numerici che si formano in ciascun lato degli infiniti quadrati che si ricavano dalla Spirale del matematico polacco Stanislaw Ulam

Nanobrain Anirban Bandyopadhyay, 2020-04-03 Making an artificial brain is not a part of artificial intelligence It will be a revolutionary journey of mankind exploring a science where one cannot write an equation a material will vibrate like geometric shape and then those shapes will change to make decisions Geometry of silence plays like a musical instrument to mimic a human brain our thoughts imagination everything would be a 3D shape playing as music composing music would be the brain s singular job For a century the Turing machine ruled human civilization it was believed that irrespective of complexity all events add up linearly This book is a thesis to explore the science of decision making where events are 3D geometric shapes events grow within and above never side by side The book documents inventions and discoveries in neuroscience computer science materials science mathematics and chemistry that explore the possibility of brain or universe as a time crystal The philosophy of Turing the philosophy of membrane based neuroscience and the philosophy of linear sequential thought process are challenged here by considering that a nested time crystal encompasses the entire conscious universe Instead of an algorithm the pattern of maximum free will is generated mathematically and that very pattern is encoded in materials such that its natural vibration integrates random events exactly similar to the way nature does it in every remote corner of our universe Find how an artificial brain avoids any necessity for algorithm or programming using the pattern of free will
