The Future Of The Electronic Marketplace:

The Future of the Electronic Marketplace Derek Leebaert, 1999-08-18 The electronic marketplace is a global one and it is changing every aspect of the consumer vendor relationship The marketplace is the place of exchange between buyer and seller Once one rode a mule to get there now one rides the Internet An electronic marketplace can span two rooms in the same building or two continents How individuals firms and organizations approach and define the electronic marketplace of the future depends on people's ability to ask the right questions now and to take advantage of the opportunities that will arise over the next few years The contributors to this volume are prime movers in major industries that are remaking themselves in order to shape the global marketplace They examine the consumer's new powers to assess and exchange goods and services over unparalleled distances They discuss the opportunities and risks posed by the new integration between manufacturer and consumer by the erosion of centralized authority by real time choice in every financial contingency and by the fact that travel and transportation have been delegated to the machine processes that can best handle them They also reflect on how to set an intelligent value on the coming changes on the tools and procedures required to create this new marketplace of marketplaces Contributors Les Alberthal William D Bandt Robert J Bonometti David Braunschvig Stephen D Crocker Walter Forbes Denos Gazis Daniel E Geer Jr Irving Goldstein Edward D Horowitz Daniel P Keegan Raymond W Smith Russel B Stevenson Jr Patrick E White **Doing E-Business** David Taylor, Alyse D.
