The Future Of The Sciences And Humanities:

The Future of the Sciences and Humanities Peter A. J. Tindemans, Rob Visser, A. A. Verrijn Stuart, James McAllister, 2002

The Future of the Sciences and Humanities James McAllister, 2002 A discussion of the future of interdisciplinary research

The Sustainable University of the Future Mariam Ali S A Al-Maadeed, Abdelaziz Bouras, Mohammed Al-Salem, Nathalie Younan, 2023-01-17 The Sustainable University of the Future discusses the rapid changes taking place within institutions of higher education changes that have pushed universities to reconsider their traditional policies and plans The book which has its origins in the Qatar University Annual Research Forum and Exhibition QUARFE event University of the Future examines the many ways universities are trying to keep pace with this transformation despite regional and international challenges The book looks at the role of universities in meeting the United Nations Sustainable Development Goals SDGs the impact of Industry 4.0 the social aspects of University 4.0 and the future of research based universities The need to adopt modern programs and tools is stressed and ways to anticipate and plan for future challenges are explored *Knowledge Economy, Development and the Future of Higher Education* Michael A. Peters, 2007-01-01 Prophetically almost thirty years ago Jean Franois Lyotard forecast the end of the modern research university based on Enlightenment principles He envisaged the emergence of technical institutes in the service of the information rich global multinationals This book reflects on the post war Western university and its discourses charting the crisis of the concept of the modern university First it examines the university within a global networked economy second it adopts poststructuralist perspectives in epistemology politics and ethics to appraise the role of the contemporary university third it introduces the notion of development in a critical fashion as a way of explaining its potentially new regional and international learning roles fourth it analyzes the rise of global science and the disciplines in the context of the global economy and finally it raises Lyotard's logic of performativity and the assessment of research quality within a neoliberal economy linking it firmly to the question of freedom and the republic of science The Impact and Future of Arts and Humanities Research Paul Benneworth, Magnus Gulbrandsen, Ellen Hazelkorn, 2016-11-17 Drawing on original international research by a cross European social science team this book makes an important contribution to the discussion about the future of arts and humanities research It explores the responses of these fields to the growing range of questions being asked about the value impact and benefit of publicly funded research The objective is to better understand what really matters rather than what is easily measured The book increases our understanding of the contribution which university based arts and humanities research makes to society and the economy by exploring how it is defined appreciated and accounted for by researchers policymakers and civil society It identifies appropriate practices and methodologies to assess and demonstrate quality and value beyond the academy The book will be essential reading for researchers and policymakers as well as research organisations and anyone interested in the arts and humanities Predicting the Future in Science, Economics, and Politics Frank Whelon Wayman, The Late Paul R.

Williamson, Solomon Polachek, Bruce Bueno de Mesquita, 2014-08-29 It is a puzzle that while academic research has increased in specialization the important and complex problems facing humans urgently require a synthesis of understanding This unique collaboration attempts to address such a problem by bringing together A New Science for Future Simon David Hirsbrunner, 2021-07-02 Building on concepts from Science Technology Studies Simon David Hirsbrunner investigates practices and infrastructures of computer modeling and science communication in climate impact research The book characterizes how scientists calculate future climate risks in computer models and scenarios but also how they circulate their insights and make them accessible and comprehensible to others By discussing elements such as infrastructures visualizations models software and data the chapters show how computational modeling practices are currently changing in light of digital transformations and expectations for an open science A number of inventive research devices are proposed to capture both the fluidity and viscosity of contemporary digital technology Iraq, Democracy and the Future of the Muslim World 'Alī Pāyā, John L. Esposito, 2011 Topics such as the compatibility of Islam and democracy and the question of whether democracy can be encouraged in the Middle East are looked at carefully Contributors evaluate the circumstances under which democracy can be imposed by outside force and ask what forces are driving the confrontation between the West and Islam before looking at how this confrontation is likely to develop Storytelling and the Future of Organizations David M. Boje, 2011-04-26 Pioneering thinker in organizational communication David Boje here compiles a collection of new essays on the theme of antenarrative or non linear narrative as applied to organizations and business bringing together different approaches and philosophical interpretations of the concept **The Future Catches Up** Ralph Morris Goldman, 2002 Professor Goldman has contributed articles and books in diverse fields of political science This is a partial collection of his principal published and unpublished journal articles as well as brief references to his principal books Professor Goldman's years at Michigan State and San Francisco State Universities provided opportunities for instructional experimentation and management of educational programs at MSU the American Politics Graduate Training Program at San Francisco State experiments in small group peer instruction Other experiments self paced instruction an assessment program for political science majors and simulations of disarmament conferences His RolePlay is an innovative teaching program for K 12 social studies
