The Future Of Welfare:

The Future of Welfare in a Global Europe Bernd Marin, 2017-03-02 What is the future of welfare in Europe The European welfare state is generally considered to be one of the finest achievements of the post 1945 world Set up to eradicate poverty by providing a minimum standard of living and social safety net the welfare state has come under increasing strain from ageing societies growing unemployment a deskilling society and mass migration both from inside and outside of Europe With contribution from some of Europe's leading experts on this subject this path breaking volume highlights the internal and external pressures on the welfare state and asks whether any European welfare model is sustainable in the long term This book will be of interest to all students academics and professions working in the field of European social policy The Future of the Social Investment State Marius R. Busemeyer, Caroline de la Porte, Julian L. Garritzmann, Emmanuele Pavolini, 2020-04-02 Social investment is part of a strategy to modernize the European welfare states by focusing on human resource development throughout the life course while ensuring financial sustainability The last decades have seen cost containment in areas such as pensions and health care but also expansion in areas such as early childhood education higher education and active labor market policies This development is linked to a Social Investment SI approach which should ideally promote a better reconciliation of work and family life high levels of labor market productivity and strong economic growth while also mitigating social inequality However institutionalization of policies that may mainly benefit the middle class has some unintended effects such as perpetuating new inequalities and the creation of other Matthew effects While research on the rise of the social investment state as a new paradigm of social policy making for European welfare states has grown significantly there are still important gaps in the literature The chapters in this book address the controversies around social investment related to inequalities individual preferences and the politics of social investment This volume is therefore organized around policies politics and outcomes The contributing authors bring together expert knowledge and different perspectives on SI from several disciplines with original path breaking empirical contributions addressing some key questions that thus far are unanswered related to Matthew effects inequalities ambiguities of social investment and institutional complementarities Furthermore it is the first volume that covers the core policy areas of social investment childcare education and labour market policies The chapters in this book were originally published in a special issue of the Journal of European Public Policy Deliberative Democracy for the Future Genevieve Fuji Johnson, 2008-01-01 The theory of deliberative democracy promotes the creation of systems of governance in which citizens actively exchange ideas engage in debate and create laws that are responsive to their interests and aspirations While deliberative processes are being adopted in an increasing number of cases decision making power remains mostly in the hands of traditional elites In Democratic Illusion Genevieve Fuji Johnson examines four representative examples participatory budgeting in the Toronto Community Housing Corporation Deliberative Polling by Nova Scotia Power Incorporated a national consultation process by

the Canadian Nuclear Waste Management Organization and public consultations embedded in the development of official languages policies in Nunavut In each case measures that appeared to empower the public failed to challenge the status quo approach to either formulating or implementing policy Illuminating a critical gap between deliberative democratic theory and its applications this timely and important study shows what needs to be done to ensure deliberative processes offer more than the illusion of democracy

The Future of the Welfare State Francis G. Castles, 2004-07-08 Written by one of the world's leading policy researchers this book seeks to assess the threat posed to modern welfare states by globalization and demographic change Using empirical methods and bringing together insights from across the social sciences Castles interrogates a range of theories suggesting that the welfare state is in crisis Systematically using data for 21 advanced OECD nations he distinguishes crisis myths from crisis realities locating in the process likely trajectories of welfare state development in coming decades The findings of this book confront many of the basic assumptions of contemporary scholarship Economic globalization has not led to a race to the bottom Analogous processes within the European Community have not led to a downward harmonization of social spending There is no new politics of the welfare state with the Left still outspending the Right Over the past two decades spending has been increasing and converging across the OECD Rather than being in a state of crisis western welfare states have achieved a steady state The supposed impact of population ageing on social welfare budgets also turns out to be myth with differences in spending actually being a function of the structure of welfare systems not of any demographic imperative The only potentially real threat is of rapidly declining fertility but Castles argues that welfare state spending in the form of family friendly public policy is in fact our best defence against this problem This is a book with significant policy implications It identifies the factors likely to mould welfare state growth and decline in future years and the diverse problems and challenges confronting welfare state policy makers in different families of nations It is a book for those who like assessing evidence before jumping to unwarranted conclusions and a book for those who wish to see the shape of things to come

The Future of Equality Shlomi Segal, 2025-05-15 Philosophers have been preoccupied with the future from time immemorial But for egalitarians the future of humanity constitutes a relatively new challenge The premise of this book is that a complaint based ideal of egalitarianism faces problems when applied to the future For one thing if we suppose that future people are destined to fare better than us say in terms of overall wellbeing then allowing humanity to flourish would then represent a net increase in terms of egalitarian complaints With respect to equality at least it would be better to refrain from bringing new life into being That seems absurd This is the Anti Natalist objection to egalitarianism Second any policy aimed at reducing future inequalities and indeed any population policy at large will in all likelihood affect the identity of those who

will be born This familiar Non Identity problem poses unique problems for egalitarianism especially ones of the complaint model Arguably a person cannot have a complaint about being worse off than another when the only other alternative distribution is one in which she does not exist Put differently such a person lacks a standing to complain about this future inequality This can be referred to as the Non Identity objection or as the Standing objection to egalitarianism This book examines how to evaluate different scenarios for humanity s future from an egalitarian perspective It is argued that planning for the future does require egalitarian considerations but that egalitarianism also needs to be adapted to handle future persons As indicated a key challenge concerns how to evaluate mixed populations containing both necessary and possible persons The book proposes a pluralist approach combining egalitarianism with prioritarianism Prioritarianism itself also suffers unique problems when applied to the future chief among them the Separateness of Persons objection The book attempts to deflect these obstacles and aims to develop a coherent framework that maintains egalitarian principles while appropriately discounting the status of merely possible people Overall the book seeks to advance both our ethical assessment of humanity s future and our understanding of the nature of equality and distributive ethics more generally **The Future**

of Social Security Policy Ailsa McKay, 2005-07-25 Current debates concerning the future of social security provision in advanced capitalist states have raised the issue of a citizen s basic income CBI as a possible reform package a proposal based on the principles of individuality universality and unconditionality which would ensure a minimum income guaranteed for all members of society Implementing a CBI would consequently entail radical reform of existing patterns of welfare delivery and would bring into question the institutionalized relationship between work and welfare Ailsa McKay s book makes a unique and positive contribution to the CBI literature by examining the proposal from a feminist economics perspective Gender concerns are central to any debate on the future of social security policy in that state intervention in the field of income redistribution has differential impacts on men and women By drawing attention to the potential a CBI has in promoting equal rights of freedom for men and women this book serves to open up the debate to incorporate a more realistic and inclusive vision of the nature of modern socio economic relationships The Future of Families to 2030 OECD, 2011-12-22 This report explores likely future changes in family and household structures in OECD countries identifies the main forces shaping the family landscape to 2030 discusses the longer term challenges and suggests policy options for managing the challenges
